

## Island Nation Mourns Dead

JAPAN'S TRIPLE TRAIN WRECK,  
MINE TOLLS EXCEED 600

By CONRAD FINK

Tokyo (AP) — Japan, a nation often beset by tragedy, mourned its dead from the twin disasters of a coal mine explosion and triple train wreck that killed more than 600 persons.

The toll in the mine explosion Saturday on the southern island of Kyushu was officially put at 446 miners dead, 450 injured and 10 missing.

The train wreck left 162 dead, including an American student, and at least 70 injured. It occurred 15 miles south of Tokyo, near Yokohama, six hours after the mine disaster.

The sorrowing nation was spared another disaster Monday (Japan time). A crowded express train rammed into the rear of another train near Hiroshima, but just two persons were injured, officials said.

A spark apparently ignited a cloud of coal dust in the underground tunnels of the Miiki mine at the port city of Omuta. Many miners were burned by a giant fireball. Others suffocated in deadly carbon monoxide fumes left by the explosion.

The explosion occurred at the afternoon shift change when more than 1,300 miners were underground — twice the regular work force. Stunned rescuers found at least 100 bodies near personnel carriers used to transport the men to the surface at the end of a work day.

As the news of the explosion at Japan's largest and most modern mine spread across the nation, disaster struck again. A packed passenger train speeding toward Tokyo smashed into a derailed freight train, then leaped across the tracks into the fourth and fifth cars of a commuter train coming from the opposite direction.

Coloradoan Killed  
Among the dead was William Scott, 28, of Colorado Springs, Colo., a student at Tokyo's International Christian University. He died in a hospital a few hours later.

The combined death toll of the two accidents was the "highest since 1954 when an overcrowded ferry boat capsized in a typhoon off the island of Hokkaido and 1,172 drowned, including 56 Americans."

Survivors emerged from the Miiki mine, which accounts for 10% of Japan's coal output, with a grim picture of the carnage below.

"It was a great, great noise and the blast tumbled me off balance," said Ukichi Hamada, a 54-year-old miner who was caught by the blast because he worked two hours overtime.

Their eyes smarting as more gas seeped into the tunnel, the miners discussed their plight.

"We decided to act to-

gether and crawled through one tunnel after another trying to find a way out of the gas. We were just groping in the dark, hoping for a miracle.

"All I know is that suddenly we found ourselves a clear shaft and got out."

Wives clogged the minehead at Omuta, less than 50 miles from Nagasaki, which was devastated by an atomic bomb in 1945. Often the only answer rescuers could give to their frantic questions was mule gesture toward a blanket-covered body.

3 California Sailors  
Three young American sailors survived the train wreck. They were heading back to their ships at Yokosuka after a visit to Tokyo when the passenger train smashed into the two cars directly behind theirs.

The sailors, all Californians, were Fireman Jimmy Bolin of La Bunte, William B. Ullerick of Arleta and Seaman Larry G. Pacheco of Van Nuys.

They carried about 20 injured from the wreckage and then helped remove some of the bodies of victims.

Looked Like Flatbed  
Ullerick said one of the ill-fated coaches was so badly torn apart it looked like a flatbed car.

The dead included Hiroto Saegusa, 71, president of Yokohama City University and a noted philosopher.

EXPANSION

Nathan Grossman of 4235 Everett found getting ready for Veterans' Day a real struggle. His Army jacket from World War I days is a size 38, but he's now a size 42. The waistline has increased, too, so the trousers are new. Grossman served on the front line in France with Company B of the 89th division's 355th infantry regiment and took part in the St. Mihiel drive and the Meuse-Argonne battle. He is past commander of Lincoln's American Legion Post 3 and a past state commander of the Veterans of Foreign Wars. (Star Photo)

## Elite Corps Backs Viet Junta

... SAIGON U TO RE-OPEN

Saigon (UPI) — The 8,000-man Vietnamese "Special Forces," the elite unit that functioned as a private military arm of the deposed regime of the late Ngo Dinh Diem, was reported Sunday night to have rallied to the side of the new revolutionary government.

The official Viet Nam press agency reported the move as thousands of the Buddhist faithful flocked to Saigon's main Xa Loi pagoda to attend memorial services for soldiers killed in the Nov. 1 coup that toppled the Ngo family regime.

It was the Special Forces that spearheaded the raids on Buddhist pagodas throughout South Viet Nam Aug. 21. They also were key defenders of the

royal palace in the coup that resulted in the deaths of Diem and his adviser-brother, Ngo Dinh Nhu.

University To Open  
At the same time, the official press agency said that Saigon University, which has been closed since student demonstrations against the old regime late last August, will be reopened next week.

High school and university students have been staging small demonstrations and meetings inside the schools since last week's coup to agitate for removal of teachers and professors they accused of aiding and abetting the deposed government.

The agency quoted "authoritative sources" as saying that "the Special Forces, which went into hiding when the revolution broke out, have rallied to the new government."

"These forces total 8,000 men," the official agency report said.

Executed  
The Special Forces commander and former top pal-

ace security chief, Col. Le Quang Tung, was reported to have been executed by junta leaders shortly after the coup. Reliable military sources said Tung's brother, and former chief of staff, Maj. Le Quang Thieu, also was shot secretly last week by the new military rulers.

A spokesman said the Buddhist leaders had sent telegrams of thanks to President Kennedy, Pope Paul VI and U.N. Secretary General Thant. The telegrams were signed by the Intersect Committee, which led a four-month fight against the Diem regime.

The telegram to Kennedy said: "Vietnamese Buddhists released from chains by revolution. Beg you to accept deep gratitude for high interest you extended its cause."

### New Uranium Mine

Belgrade, Yugoslavia (UPI) — Yugoslavia's first uranium mine began operations at Kalina, a small village in eastern Serbia near the Bulgarian border.

## Deadlock Could Put Nixon In Race—Ike

... DENIES 'COOLNESS' TO EX-VEEP

New York (AP) — Former President Dwight D. Eisenhower said Sunday that a deadlock at the 1964 Republican National Convention could thrust former Vice President Richard M. Nixon into the race for the presidential nomination.

At the same time, Eisenhower stated that he didn't think people "really know what they mean" when they say they are for Sen. Barry Goldwater "because he is a conservative."

The former chief executive said Nixon has told him he "has no interest" in running for president again. Eisenhower added:

"Now if there should be one of those deadlocks... I think he (Nixon) would be one of the likely persons to be examined and approached because he is after all a very knowledgeable and a very courageous type of person."

Eisenhower made his statements on the Columbia Broadcasting System television program, "Face The Nation," while discussing his new volume of memoirs, "Mandate for Change, 1953-1956, the White House Years."

Eisenhower injected the name of Sen. Goldwater, considered a leading unofficial contender for the GOP nomination, when asked which way he thought the nation was swinging.

"... As you know," he replied, "I have deplored this use of the terms conservative and liberal. They seem to have become distorted, almost reversed in their meanings." He continued:

"Now, I think that Sen. Goldwater right now is a very popular figure and a popular name and people say they are for him because he is a conservative. But they really don't know, I think, exactly what they mean."

### Asked About Debates

Eisenhower was asked whether he thought Goldwater and Gov. Nelson A. Rockefeller, so far the only announced Republican candidate for the nomination, should offer solutions to problems by "debate and constant discussion."

(Rockefeller has challenged Goldwater to debate him and Goldwater turned him down on the basis of maintaining Republican Party unity).

Eisenhower replied: "Well, I think Gov. Rockefeller is right in saying we ought to express personally and as a party what is our approach to these problems."

"How would we go about tackling them? We know you will never get any answer that in its details will satisfy everybody. You have to think of the great mass of the American people who say, we want something that is done that conforms to common sense, and to find what that solution is, they can be told

dates telling them exactly what they are going to do."

### "Coolness"

Told that some reviewers of his new book had discerned what they interpreted as a "coolness" toward Nixon on the part of Eisenhower, the elder statesman replied:

"... Strangely enough that impression has just persisted

throughout the years and I never have known why."

Eisenhower said he went to California last year for a talk "and I put these, my favorable opinions (on Nixon) into the most emphatic language I possibly could, and I have done it more than once in front of press conferences..."

On another tack, Eisenhower

believed that the Tennessee Valley Authority should be sold to private industry.

### "Way of Life"

Asked if he were now president would he advocate sale of the TVA, Eisenhower replied that the project had become "a way of life" to the people it benefits and it should remain in government control.

HOME FOR HOBOES... debris-filled shed near 20th and N.

## 'Hotel D'Hobo' Attracts Steady Stream Of Bums

By TOM KEITH  
Star Staff Writer

To the constant traveler—the wino, the bum—Lincoln offers a "Hotel D'Hobo"—a ramshackle row of abandoned frame houses around 20th and N. near the center of the city.

Identified by dense, heavy weeds, piles of junk and garbage, and a sagging wooden fence in front, the broken windows and leaking roofs don't deter the men of the road from using its filthy shelter as a residence during

a one or two days' layoff in their travels.

As many as 40 transients have been found at one time in the free flophouses, along with every type of insect imaginable. One permanent resident—a battle-scarred tomcat named Butch by the less permanent inhabitants—earns his keep by making a dent, however small, in the mouse and rat population.

Indoor Junkyard  
Lincoln police know the hobo hangout and its inhabi-

tants well and call it one of the few "indoor junkyards" in the city.

Officers Robert Neely and Al Maxey frequently are detailed to the 20th and N area to arrest drunks and vagrants and to investigate minor thefts and other offenses.

The officers describe the men they find there as "about average bums."

"They are generally 35 to 40 years old, but appear much older, thin, unshaven and unkempt."

"Almost all of them are drifters," said Maxey, "and are constantly passing through everywhere. They can always tell you where they are going, but they never can remember where they have been, or don't want to."

"Fellows Who Fall"  
"One particular gentleman we picked up about a year ago stands out in my mind," said Neely. "He was pretty typical of the fellows that fall to this type of life."

"He was 48 or 49 years old, had long, shaggy hair, was bearded, and was dressed very poorly. However, in talking to him it was quite obvious the man was an intellectual."

The officer related the man's story: "He had been on the road for about eight years. He traveled by railroad—always without a ticket of course. He was an alcoholic. He lived in various flophouses across the country. He said, and confirmed, he had a master's degree from Columbia University in journalism and English and prior to going on the road had worked on a Chicago newspaper."

"He had a police record; and an FBI 'rap sheet' said he had served time for num-

## Waiter With U.S. NATO Delegation As 'Liaison'

London (AP) — Rep. Wayne L. Hays, D-Ohio, said Sunday he brought the head waiter of the House of Representatives dining room to Paris on an expenses-paid trip to serve as liaison man for the American delegation to a NATO parliamentary conference.

The trip by waiter Ernest Petinaud has caused considerable comment in Washington. "Petinaud, who is French-speaking," said the congressman "is on vacation. He acted as a liaison man between the American delegation and NATO headquarters, taking and bringing messages."

Involves Trips  
This would involve trips back and forth from the Hotel Continental in downtown Paris, where the delegation stayed, to NATO headquarters on the west side near the Bois de Boulogne. This task is usually performed by the French-speaking drivers permanently attached to the U.S. mission to NATO.

"He worked for us for his expenses on this trip," Hays said, "and got no other remuneration."

The delegation to the NATO meeting is on its way home. They traveled from Washington in an Air Force plane assigned to them.

Among them is Sen. Estes Kefauver's widow, listed as an observer. Other members of the group are Leslie C. Arnds, R-Ill., Ross Bass, D-Tenn., Charles Chamberlain, R-Mich., Wilfield K. Denton, D-Ind., John Lindsay, R-N.Y., and Mendel L. Rivers, D-S.C.

### Two Women

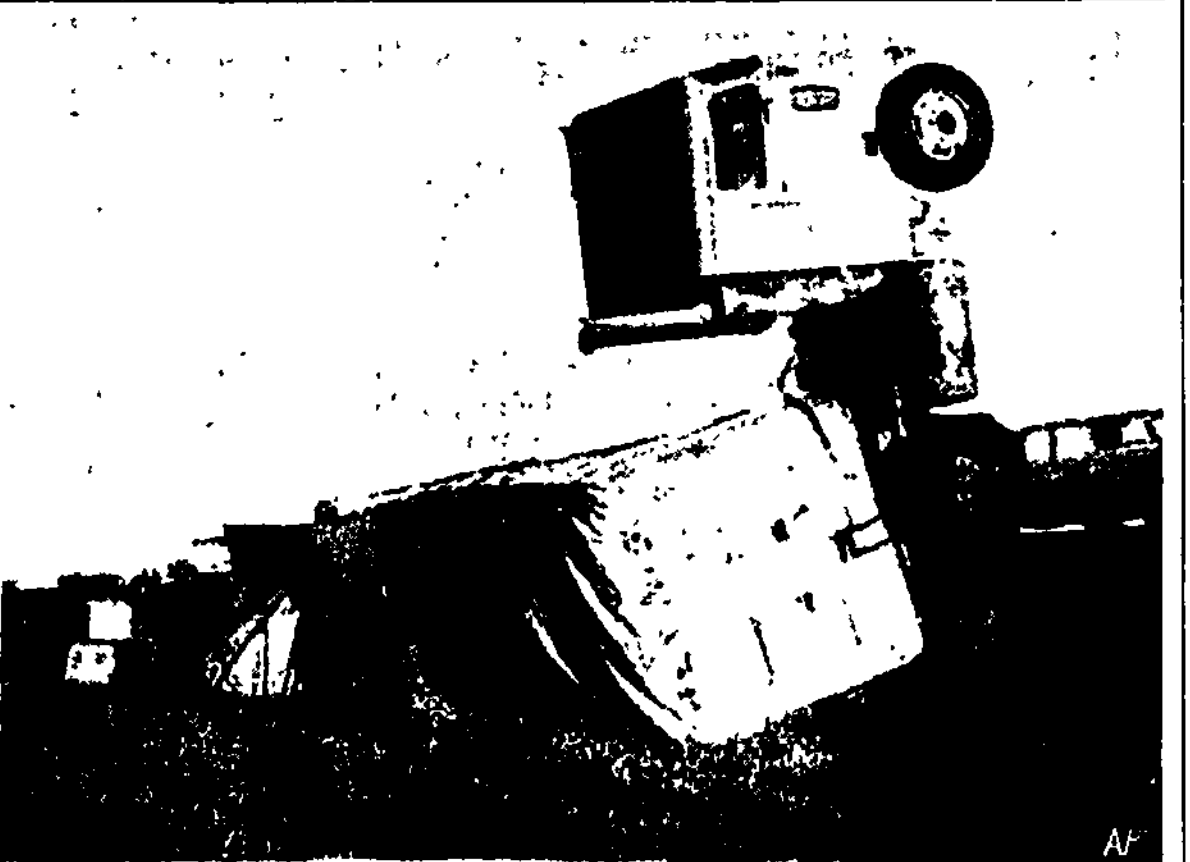

They also have a staff with them, including two women from Hays' office.

Rep. Bass said, "The staff has been chosen by Mr. Hays and as far as I am concerned, has done an excellent job in carrying out their duties."

The representatives will be guests of the British-American parliamentary group at a luncheon Monday and attend the opening of the House of Commons on Tuesday. They are scheduled to fly back to Washington Wednesday.

(Continued on Page 3, Col. 4)

## Complaint Starts City's Condemnation Process

Lincoln's city building inspector, asked about a row of abandoned houses currently being used by hoboes as "flophouses" says that the procedure required to get a building condemned should start with a complaint to his office.

City Atty. Ralph Nelson told the Star anyone can make a complaint to the building inspector's office about a house or building, adding, "If they (the police) are aware of the conditions there, they could make such a complaint."

But Asst. Police Chief Orren Graves said police "feel it is the job of the building inspector's office to condemn buildings."

As many as 40 transients have been found at one time in the buildings, and police report that frequent checks and arrests do not seem to stop the hoboes' use of the buildings.

**Must Be Hazard**

Building Inspector E. A. Vorhees said that in order to condemn a house or a building, it must be found to be structurally unsound, a serious fire hazard, or a serious health hazard.

He said the procedure usually starts by someone complaining to his office about the building. A check of the building is then made and a report submitted to the City Council or the mayor stating that the house either is or is not structurally unsound, a serious fire hazard or a serious health hazard.

The owner is then notified (if the building is found to be of the type that should be condemned) to appear at a public hearing on a certain date to show cause why such action should not be taken.

Dr. G. R. Underwood, City-county health director, said the hands of the Health Department are tied on quarantining these houses, due to the lack of power given by city ordinances.

"The minimum housing ordinance has no effect on these houses — there is nothing we can do until we get a comprehensive minimum housing law. We need a law with some teeth in it," he said.

Dr. Underwood said the minimum housing ordinance as it now stands does not pertain to houses existing prior to the enactment of the law.

"A housing code should be retroactive if we are to accomplish very much."

Dr. Underwood said the Health Department can take action "if we have complaints that the building may harbor disease. We can file a complaint against the owner."

He said the Health Department has had complaints about these four particular houses.

"The Health Department has no police power — we must work through the courts. In order for condemnation a complaint must be filed at the city building inspection office."

# Subsidies Essential To U.S. Way Of Life

... ASCS CHIEF WRITES IT'S UNFAIR TO MAKE AGRICULTURE SCAPEGOAT

(Editor's Note: The following article was written by Hans O. Jensen, chair-man of the Nebraska State Agricultural Stabilization and Conservation Service Committee.)

Subsidization is the oldest economic principle written into U.S. laws. Subsidies have helped education, U.S. banks, housing groups, airlines, railroads, waterways and other necessary ingredients in our American way of life and it is unfair to single out agriculture as a recipient of subsidies and make it a scapegoat.

No one should let themselves be stamped into a state of fear because the federal government through the Commodity Credit Corp. has spent \$36.4 billion in the past 30 years. There is no better place to make this investment than in the basic American industry, namely, agriculture. In fact, if this had not been done, many of the things which this has accomplished would not have been possible and would have had serious aftereffects.

The CCC came into existence when the nation faced a state of emergency. Banks were going broke and failing to open. Industry was idle because of the inability to sell their products. Labor was idle because of lack of job openings—all because of farm income having fallen to a level

where farmers were facing bankruptcy and leaving the farms in large numbers. We were starving in the midst of plenty.

## Done By Congress

The CCC was formed through congressional action. Support prices were placed under farm commodities. Farm purchasing power began to rise and a gradual thawing out of the nation's potential began. Today, because of the need for it, we are confronted with an annual defense budget which actually is in excess of the 30-year expenditure of the CCC.

It is indeed doubtful that this necessary defense budget could be available for our country's protection, if it had not been for the investment of the CCC in the past 30 years. It can be said that our ability to cope with communism has been materially strengthened because of the support to our economy through the existence of the CCC. It is therefore a major cog in our defense system.

Let us take a closer look at what the CCC really does. In addition to placing a support price under farm commodities (most of which it recovers), it is responsible for supplying all of the commodities which go into the school lunch pro-

HANS O. JENSEN

gram, a program which has been extremely successful and has benefited every child in the United States and many homes. The school lunch program is reaching 82 million people daily, 28 million of them in the U.S. and 37 million overseas. In many, many instances, this is the only meal that stands between these children and starvation. It is impossible to measure the good that is done with this program alone.

In Times Of Trouble The CCC moves in with

supplies in case of disaster, flood and emergencies of almost any nature. Two years ago even the pheasants of South Dakota were recipients of CCC grain to sustain them when the snow cover was so deep they were dying by the thousands.

The CCC is responsible for supplying the food for the Food for Peace program. The 1964 budget carries a \$1.9 billion appropriation for this item.

In looking at the impact upon farm income, we are not entirely factual when we say that livestock prices are not sustained by the CCC. Nearly all people will admit that cheap feed makes cheap livestock. Consequently, it must be admitted that the support price under grain has had a supporting effect upon livestock. In addition to that, the CCC has in the past entered markets and brought vast amounts of meat in order to sustain livestock prices. These commodities were later released into market channels without running prevailing prices or were disposed of to the needy.

The very fact is that the family-type farm, which is the envy of the whole world for its efficiency, has been sustained by the funds from

the CCC and makes it possible for the wage earner in the United States to buy his food for only 19% of his take-home pay. He eats better and buys more food than anyone else anywhere in the world. The share of his income used for food is the lowest in history.

## Patriotic Challenge

During World War II farmers were urged to increase production. They rose to this patriotic challenge because they knew that food could win the war and write the peace. Food produced in the U.S. was shipped to our allies to assist them in winning not only the war at hand but to assist them in reconstruction following the war. Support prices, made possible through the CCC, were responsible for this war effort.

Subsidies made through the CCC to sustain farm purchasing power are small compared to subsidies paid various other segments of our economy.

World War II reconversion on the part of industry drew a handsome sum of \$43.3 billion to retool.

Mineral depletion from 1933 to 1960 drew \$40.8 billion.

Ship subsidies from 1939 to 1959 drew \$4 billion.

Mail subsidies from 1946 to 1961 drew \$8.2 billion.

## Guards' Bullets Wound 8 California Prisoners

Soledad, Calif. (AP) — Ricocheting bullets fired by guards wounded eight convicts at Soledad Correctional Facility Sunday during the second riot of the day.

Prison officials said none of the inmates—whose names were not released—was injured seriously, but four were hospitalized.

A battle among 50 to 60 inmates broke out in a cell wing several hours after a chair-throwing incident during a movie.

Whites vs Negroes Ray Maynard, assistant to the warden of the state institution south of Salinas, said the cell wing battle pitted whites against Negroes in about equal numbers.

He said convicts refused an order to return to cells, so a tear gas shell was fired. This didn't work either, so guards fired warning shots which wounded the eight and sent the rest back to their cells.

Earlier, convicts watching a movie began booing and catcalling when a newsreel

showed part of a rodeo at another prison. When several chairs were thrown, authorities shut off the movie, sent the convicts back to their cells and, said Maynard, thought the disturbance was over.

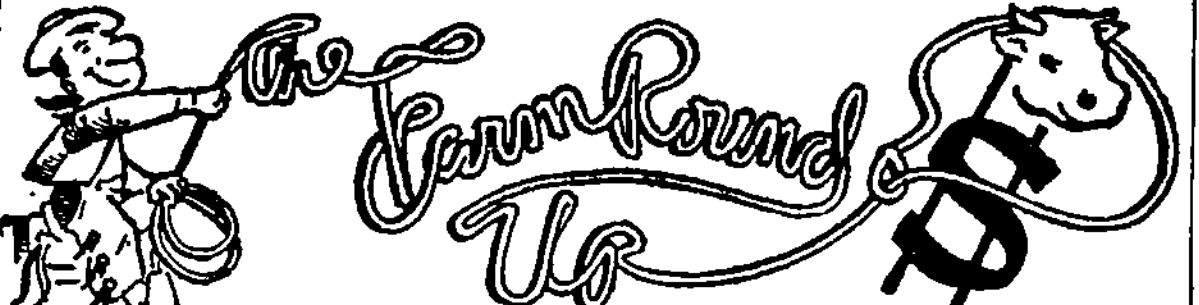

Maynard said the second riot was apparently related to the first.

## Dad On Errand For Ice Cream Beaten, Killed

Deepwater, Mo. (AP) — A 51-year-old man beaten Saturday night while on an errand to get ice cream for his 10 children, died Sunday at a Clinton, Mo., hospital.

He was Quilla (Bud) Lewis, a brick mason and life-long resident of Deepwater. He had purchased the ice cream and was walking home when he was struck with a heavy blunt object.

Lewis was not robbed, Sheriff Wilbur Schmidt said.

By Glenn Kreuscher, Farm Editor

Secretary of Agriculture Orville Freeman and his aides keep telling cattlemen that record beef imports are only a minor factor in the decline of domestic beef prices.

Cattlemen think otherwise, and they are just as strong in making claims that the beef imports will cause no end of trouble.

One of the most widely traveled feeders, D. W. Lewter of Lubbock, Tex., who has appeared on a number of Nebraska cattle programs, had this to say:

"I am worried about the amount of beef being imported which has now reached 12% of our total annual consumption.

"And make no mistake about it, it's not all so-called 'manufacturing' beef, and don't let anyone tell you it doesn't affect the price of domestic beef. Just stop and figure it out."

Lewter says the figures show that if you compare imports with numbers of cattle, the answer amounts to more than three million head of cattle competing with the U.S. market.

Movement Down The movement of stocker and feeder cattle and calves to the country from the Omaha market reached the small-

est number for October in 22 years.

Reports from the West say that the waiting game on purchase of feeders is easing, with more of the feeders getting cattle in line with the prices they expected to pay.

The University of Nebraska outlook chart shows that the approximate break-even feeder prices that can be paid for 700-pound good to choice yearling feeders purchased in lots of 120 head where feed costs average \$20 per hundredweight of gain on intensive 165-day feeding and sold at 1,100 pounds would be \$23.30 per hundredweight if the cattle were sold at \$24.00 per hundredweight.

Campaign Issue Washington farm writers say that a major farm issue in next year's presidential campaign undoubtedly will be beef cattle price declines and an increasing volume of imports.

Newsmen who covered Freeman's "Report and Review" meetings with farmers said he ran into the beef import question in most of his visits.

There is a new handbook out for landowners interested in going into the recreation business. It's entitled, "Rural Recreation Enterprises for Profit—An Aid to Rural Area Development." If you ask your extension service for a copy, refer to Agricultural Information Bulletin 277.

Source Of Income The 44-page bulletin is addressed to private landowners

and operators, who have about three-fourths of the nation's land and who increasingly are turning to outdoor recreation as a new source of income, says the USDA.

The USDA says the publication is designed to help landowners make decisions and to aid them in planning, developing and managing a recreation enterprise.

The annual report of the American Hereford Association shows six Nebraska Herefords registering more than 200 head during the last fiscal year.

Zero Hereford Ranch at Loup City led with 618 head. Carl Lindgren of Bridgeport was second with 468 and the University of Nebraska reached third high with 342 Herefords recorded.

The 1963 Ak-Sar-Ben grand champion steer was a champion on the rail as well as on foot, according to Arden Aegerter, Ak-Sar-Ben livestock manager.

When slaughtered the grand champion was graded prime with a fat covering of .75 of an inch and a 14.04 square inch loin eye with a 64.8% yield, which is a near-record performance in beef production.

Tuesday Creamed browned ground beef over biscuit Bread and butter sandwich Tossed fresh vegetable salad Beet slice Fruit Milk

We come now to Veterans' Day. Everybody is a veteran of something. Of life for one thing — though I don't see any government putting out any Purple Hearts for it.

When this day was being born, it was called Armistice Day.

We were in knee pants and filled with patriotic fervor. Hamburgers had been changed to "Liberty steaks." Recruiting posters showed horrid looking enemy soldiers, fanged and dripping with gore.

Our British allies were heroes of stiff-lipped trench warfare.

Our French allies were wine-drinking heroes of, "They shall not pass!"

American soldiers were known as doughboys. They sang "Mademoiselle from Armentieres." And it was well-known that some inborn sense of frontier marksmanship made everyone an automatic sharpshooter.

Every citizen was urged to raise a Victory Garden.

The song hit of the war was "Over There."

It took a second World War to produce another crop of veterans. President FDR sent the word: "Greetings!"

It was well-known that the enemy wore glasses. He therefore had weak eyes and hence could not hit the broad side of a barn.

By the time the shooting was over, 12,000,000 men had been greeted.

Stood in a naked, shivering line. Got prodded and punched. Listened to and questioned.

Issued clothing stiff with gas-proof chemicals.

Punctured by needles. Injected with germs that made war too horrible to fight and the receiver too weak to lift his head.

Everybody who survived was a veteran.

Korea added more instant veterans. The interesting thing about Veterans' Day is that the club is no longer exclusive.

The club is wide open and it seems that everybody is trying to get everybody else in.

It is a club that nobody really cares to join—it's not the fact of being in, it's the initiation.

If you could just become a veteran without the opening stages.

Well, there's something about a soldier that is fine, fine, fine. And the time I first became a veteran was when we were still coming to Armistice Day. We dug our trenches in a

vacant lot and stormed out of them with patriotic cries. (It was an imaginary enemy. For even the little kids would not pretend to be enemies and were likely to go home crying and tell their mothers.) However, we got imaginatively shot and staggered and collapsed in victory saying, "Take care of the Lieutenant first, doc. He's my buddy!"

The excellent thing about becoming a veteran this way was that it could be done over and over again. Without any harmful side effects.

"Give me the message, Captain! I'll get through the enemy lines!"

The hero would then snake his way out of the back lot trench. Squirm through the alley behind the garbage cans. Through the sand lot where we raised the Victory Garden with the woody tasting radishes.

Deliver the message and return full of imaginary bullet holes.

And when I think of how easily and happily kids could become veterans in those happy days, it would seem that adults could think up a better way of doing it than we do today.

All we have done is make it difficult.

# Subsidies Essential To U.S. Way Of Life

... ASCS CHIEF WRITES IT'S UNFAIR TO MAKE AGRICULTURE SCAPEGOAT

(Editor's Note: The following article was written by Hans O. Jensen, chairman of the Nebraska State Agricultural Stabilization and Conservation Service Committee.)

Subsidization is the oldest economic principle written into U.S. laws. Subsidies have helped education, U.S. banks, housing groups, airlines, railroads, waterways and merchant fleets. They are a necessary ingredient in our American way of life and it is unfair to single out agriculture as a recipient of subsidies and make it a scapegoat.

No one should let themselves be stamped into a state of fear because the federal government through the Commodity Credit Corp. has spent \$36.4 billion in the past 30 years. There is no better place to make this investment than in the basic American industry, namely, agriculture. In fact, if this had not been done, many of the things which this has accomplished would not have been possible and would have had serious aftereffects.

The CCC came into existence when the nation faced a state of emergency. Banks were going broke and failing to open. Industry was idle because of the inability to sell their products. Labor was idle because of lack of job openings—all because of farm income having fallen to a level

where farmers were facing bankruptcy and leaving the farms in large numbers. We were starving in the midst of plenty.

**Done By Congress**  
The CCC was formed through congressional action. Support prices were placed under farm commodities. Farm purchasing power began to rise and a gradual thawing out of the nation's potential began. Today, because of the need for it, we are confronted with an annual defense budget which actually is in excess of the 30-year expenditure of the CCC.

It is indeed doubtful that this necessary defense budget could be available for our country's protection, if it had not been for the investment of the CCC in the past 30 years. It can be said that our ability to cope with communism has been materially strengthened because of the support to our economy through the existence of the CCC. It is therefore a major cog in our defense system.

Let us take a closer look at what the CCC really does. In addition to placing a support price under farm commodities (most of which it recovers), it is responsible for supplying all of the commodities which go into the school lunch pro-

HANS O. JENSEN

gram, a program which has been extremely successful and has benefited every child in the United States and many homes. The school lunch program is reaching 82 million people daily, 26 million of them in the U.S. and 37 million overseas. In many, many instances, this is the only meal that stands between these children and starvation. It is impossible to measure the good that is done with this program alone.

**In Times Of Trouble**  
The CCC moves in with

supplies in case of disaster, flood and emergencies of almost any nature. Two years ago even the pheasants of South Dakota were recipients of CCC grain to sustain them when the snow cover was so deep they were dying by the thousands.

## POSTCARD by Stan Kellaplan

We come now to Veterans' Day. Everybody is a veteran of something. Of life for one thing — though I don't see my government putting out any Purple Hearts for it.

When this day was being born, it was called Armistice Day.

We were in knee pants and filled with patriotic fervor. Hamburgers had been changed to "Liberty steaks." Recruiting posters showed horrid looking enemy soldiers, fanged and dripping with gore.

Our British allies were heroes of stiff-lipped trench warfare.

Our French allies were wine-drinking heroes of, "They shall not pass!" American soldiers were known as doughboys. They sang "Mademoiselle from Armentieres." And it was well-known that some inborn sense of frontier marksmanship made everyone an automatic sharpshooter.

Every citizen was urged to raise a Victory Garden.

The song hit of the war was "Over There."

It took a second World War to produce another crop of veterans. President FDR sent the word: "Greetings!"

It was well-known that the enemy wore glasses. He therefore had weak eyes and hence could not hit the broad side of a barn.

By the time the shooting was over, 12,000,000 men had been greeted.

Stood in a naked, shivering line. Got prodded and punched. Listened to and questioned.

Issued clothing stiff with gas-proof chemicals.

Punctured by needles. Injected with germs that made war too horrible to fight and the receiver too weak to lift his head.

Everybody who survived was a veteran.

Korea added more instant veterans. The interesting thing about Veterans' Day is that the club is no longer exclusive.

The club is wide open and it seems that everybody is trying to get everybody else in.

It is a club that nobody really cares to join—it's not the fact of being in, it's the initiation.

If you could just become a veteran without the opening stages.

Well, there's something about a soldier that is fine, fine, fine. And the time I first became a veteran was when we were still coming to Armistice Day. We dug our trenches in a

vacant lot and stormed out of them with patriotic cries. (It was an imaginary enemy. For even the little kids would not pretend to be enemies and were likely to go home crying and tell their mothers.)

However, we got imaginatively shot and staggered on and collapsed in victory saying, "Take care of the Lieutenant first, doc. He's my buddy!"

The excellent thing about becoming a veteran this way was that it could be done over and over again. Without any harmful side effects.

"Give me the message, Captain! I'll get through the enemy lines!"

The hero would then snake his way out of the back lot trench. Squirm through the alley behind the garbage cans. Through the sand lot where we raised the Victory Garden with the woody tasting radishes.

Deliver the message and return full of imaginary bullet holes.

And when I think of how easily and happily kids could become veterans in those happy days, it would seem that adults could think up a better way of doing it than we do today.

All we have done is make it difficult.

## Soviet Scientist Sheds No Light On Spaceship

By REINHOLD G. ENSZ

Moscow (AP) — A top Soviet scientist said Sunday Russia's maneuverable spaceship Polyot I marked a step toward manned flights to the moon. But he failed to say what has happened to the ship since its launching in a blaze of publicity Nov. 1.

Mstislav Keldysh, head of the Soviet Academy of Science, repeated what was in the launching announcement: that the ship is maneuverable. But like other Soviet officials he said nothing about the ship's present status.

"These spaceships will enable man to move about in space as he wants," Keldysh said.

"Flights of automatic space vehicles and also manned spaceships to the moon and planets of the solar system are practically impossible without their making corrective maneuvers along the trajectory of the flight and near planets."

Moreover, one of the methods of preparing heavy spaceships for manned flights to the moon, Mars or Venus is their assembly from separate parts in orbit around the earth. The individual parts of

such spaceships should be steerable space apparatuses." His remarks were made in an interview with the official news agency, Tass.

Although Keldysh said the new ship is a "qualitative leap forward in the planned exploration of space by Soviet science," he did not reveal how much the ship can be maneuvered.

He did claim the Soviet Union is ahead in the space race. Or, as Tass reported his words:

"The lead in this difficult and complex area of scientific progress is still held by the Soviet Union."

The new ship's name "Polyot-I," means Flight-I and Keldysh said its launching "marks the transition from flights along mainly pre-set orbits to flights with extensive maneuvers."

# Bull's-Eye Bags No Elk

STAR STAFF PHOTO  
THE HUNTER... brought back a cast.

By GENE BUDIG  
Outstate Nebraska Bureau  
Columbus — Larrell Aikins couldn't wait for that first shot.

"I'd been waiting for months," recalled the wild-eyed hunter.

His chance came early one morning near Jackson, Wyoming.

Related Aikins:

"I got up extra early that morning... couldn't sleep too well... kept seeking elk in my sights."

"First I checked my rifle; it was OK."

"Then I got dressed and strapped my revolver to my side. I brought it just to make sure the big one didn't get away."

"As I bent over to get out of the tent, the hammer of my pistol hit a tent post."

"Next thing I knew, the hunt was over."

His companions hurried him to a Jackson hospital where doctors admitted he had hit the bulls-eye.

The bullet had shattered the bone in his right leg in a couple of places.

"What a way to go," grumbled the Columbus photographer, who said the pistol was a .357 magnum.

He quickly inserted, "Police use these pistols to break motor blocks... they're deadly."

Between hops to the cash register, Aikins told of plans for another hunting venture to Wyoming.

"I should be up and around in a month or so," he said. "In the meantime, I'll be dreaming again."

Only this trip, he noted, will see more than one shot.

"The pistol will go back too," Aikins added. "But there won't be a live round under the hammer."

HOB0 RESIDENCE... screened by fence, trees.

## Flophouses Get Female Hoboes Too

(Continued from Page 1)

cious charges such as drunk, vagrancy, loitering, and sex offenses.

"The man's total possessions consisted of the clothes on his back and what he had in his pockets — an old billfold (containing no money), shaving gear, and a bar of soap."

"In his billfold were a Social Security card and several 'wisdom writings,' most of them getting rather perverted," said Neely.

"When you ask one of these guys for identification, the first and sometimes only thing they will show you is a social security card," said Maxey.

The officers said not all bums are men. "Every once in a while you'll find a woman bum. She is usually with three or four men."

Although most of the men found at "Hotel D'Hobo" come from out-of-town, a few local men are also found there. But, Neely noted:

"The local bums aren't as apt to give you the criminal problems that the wandering element will."

Bottles, Jars, Peels

Inside the "hotel" are empty wine, beer and whiskey bottles of every size and shape, "girlie" magazines, banana peels and discarded clothing.

While Lincoln sleeps, "Hotel D'Hobo" is alive. The men tell stories. They fight. They drink. "They drink anything containing alcohol," Neely said, "including lemon extract, vanilla, 'canned heat,' vinegar, shellac thinner, cheap wines and liquors."

Police, despite almost nightly checking of the flophouses, cannot discourage the steady stream of transients.

Recently Neely and Officer Richard Ebert found two transients asleep on the lawn in the rear of one of the houses. A third traveler was

ASLEEP... hobo in abandoned house.

curled up on a dusty old moth-eaten sofa. He was sharing his nap with several crawling and flying insects. All three men were drunk.

Knows The Routine

Neely and Ebert had to escort two found sleeping in the grass, while the third — very accustomed to the routine of being found in the houses — staggered along to the police cruiser.

Next morning the trio

pleaded guilty in Municipal Court to charges of being drunk. All three sat out the fine in jail. The same afternoon they were released, Neely found the staggerer from the sofa at the same house again, drunk.

"He's almost a permanent resident at the station," said one policeman.

## South Lincoln Hit By Power Failure

Substantial areas in the southern one-third of Lincoln were thrown into darkness for 20 minutes Sunday night when a circuit breaker unaccountably locked open in the 70th and Prescott substations.

Consumers Public Power District's Lincoln dispatcher, J. D. West, said he knew where the power failure started but not why.

He explained that electricity quit coming into CPPD's city distribution grid from the Nebraska Public Power System's 115-kilowatt lines encircling the city when a 34.5 kw circuit breaker in the NPPS substation locked open. CPPD and NPPS crewmen were dispatched to the substation.

Power went off at 8:43 p.m. Half of it was back on by 9:06 p.m., the rest at 9:12 p.m.

The lights went back on, West said, because power was rerouted into the grid from substations at 56th and Q and 6th and Peach.

Charles Sayre, CPPD's community relations director, said areas of the city af-

### Summary of Conditions

High pressure and cool dry air over the nation from the Mississippi River west to the Pacific coast. Centers of high pressure are located over eastern Montana and northern Utah. Gulf moisture is blocked from the central plains by this high and is expected to continue to dominate the weather over the central plains through Monday night.

This means that skies will continue clear to occasionally partly cloudy with no precipitation through Monday over the Nebraska area. There will be little change in temperatures in eastern Nebraska and western Iowa Monday, but it will be a little warmer in western Nebraska.

## Mine Cave-In Kills Boy, 16

Ringwood, N.J. (UPI) — Rain-weakened earth at an abandoned open pit mine caved in Sunday, burying a teen-age boy under tons of dirt and rock. Rescuers said "there is no chance of him being alive."

Volunteers and firemen trying to reach Harry Van Dunk, 16, at the bottom of the 100-foot mine were hampered by three subsequent cave-ins, and rescue attempts were abandoned temporarily.

The pit, part of a complex of open pit mines in this rugged northern corner of New Jersey, is in a desolate wooded area which the boy used to pass in his newspaper delivery route.

## Sheet Metal Strike Here Said Settled

Informed sources said Sunday night that Sheetmetal Workers Local 541 and the Lincoln Sheetmetal Contractors Association have agreed to terms in their two-month-old dispute.

Signing of a new contract is expected this week.

Union members walked off the job Sept. 11 after 90 days of negotiations failed to result in a new contract. They began picketing Oct. 3.

The union originally asked a gradual 55 cents an hour salary increase over a three-year period, including 10 cents for a welfare fund and 10 cents for a vacation fund. Sheet metal workers now get \$3.60 an hour.

The dispute brought a \$250,000 suit filed by the contractors against the union for breach of contract, and a union change that six contractors had been unfair in negotiations. The union charge was filed with the National Labor Relations Board.

## Auto Hits Tree, Airman Injured

James Jansto, an airman at Lincoln Air Force Base, was treated at the base hospital and released early Monday morning after the car he was driving struck a tree at 49th and Lowell.

Police said the Jansto car was westbound on Lowell, making a right turn onto 49th, when it apparently went out of control, jumped a curb, and struck the tree.

A hospital spokesman said injuries to the airman included "about three" broken teeth.

Richardson, who replaced Lt. Gov. Dwight Burney as a panelist, said that Goldwater would have to "modify his views and move back more to center" if he is to become a serious candidate for the presidency.

Mrs. Hal Hasselbalch, a member of the state Young Republicans executive committee, voiced her strong support of Goldwater as a presidential candidate.

"Sen Goldwater is probably the only potential presidential candidate who has made his views crystal clear before his nomination," Mrs. Hasselbalch said.

Afraid Of Kennedys  
The senator, she commented, "is receiving a groundswell of backing from the people who fear the Kennedys."

"Republicans have compromised their party principles for 25 years at convention time on the belief that the moderate candidate can win," she said, adding that it was

time for a clear delineation between the platforms of the Republican and Democratic Parties.

Attorney Roger Dickeson noted that the Arizona senator "is now assiduously engaged in moderating his position."

Several Changes

Dickeson listed several instances in which Goldwater's stands on Cuba, taxation and government spending had changed, and added that "in enunciating his policies, he has done so in such broad terms that it is difficult to disagree with him."

He also said that the senator "is often guilty of shooting from the lip" before considering the facts of a situation.

Attorney F. Butler Shaffer, former executive secretary of the state Republican Party, said he "would consider a Goldwater administration as a potential and important first step toward a truly free nation."

Live For Self-Interest

He defended Goldwater's stand that "one man's need is not another man's obligation," explaining that "each individual has a complete right to live for his own self-interest, if he does not use force against others."

Shaffer criticized Richardson's stand that Goldwater was more effective as a spokesman for the conservative view than as a candidate, and Richardson replied that "I am a political realist."

The panelists also parried questions phoned in to radio station KFMQ, which carried the 75-minute debate. Discussion leader for the session was Dr. Carl Schneider, chairman of the University of Nebraska political science department.

## Colo. Crash Kills Columbus Woman

Wellington, Colo. (AP)—Mrs. Estella Vera Foreman, 53, of Columbus, was killed in a one-car accident on U.S. 87 about 12 miles north of Wellington Sunday.

She was a passenger in a car driven by Harold J. Foreman, 22, of Omaha. The auto went out of control and overturned. Mrs. Foreman was thrown from the vehicle.

Foreman and another passenger, Sylvia Foreman, 20, of Omaha, suffered cuts and bruises. They were hospitalized at Fort Collins.

## South Lincoln Hit By Power Failure

Substantial areas in the southern one-third of Lincoln were thrown into darkness for 20 minutes Sunday night when a circuit breaker unaccountably locked open in the 70th and Prescott substation.

Consumers Public Power District's Lincoln dispatcher, J. D. West, said he knew where the power failure started but not why.

He explained that electricity quit coming into CPPD's city distribution grid from the Nebraska Public Power System's 115-kilowatt lines encircling the city when a 34.5 kw circuit breaker in the NPPS substation locked open.

CPPD and NPPS crewmen were dispatched to the substation.

Power went off at 8:43 p.m. Half of it was back on by 9:06 p.m., the rest at 9:12 p.m.

The lights went back on, West said, because power was rerouted into the grid from substations at 56th and Q and 6th and Peach.

Charles Sayre, CPPD's community relations director, said areas of the city affected were generally south of A St.

### Switchboards Jammed

As their lights went out, south Lincolinites took to their telephones. Their calls jammed CPPD, police and newspaper switchboards. Police received a hundred calls.

Power at the State Penitentiary went out and electrically operated doors wouldn't close.

Lights went off momentarily at St. Elizabeth Hospital but came right back on. Lincoln General Hospital was apparently not affected. Power to Bryan Memorial Hospital was out for 20 minutes, but the hospital switched to emergency power and had no problems.

A "flash of light" at Cotner and Sumner was reported to police by the Lancaster County sheriff's office.

### Summary of Conditions

High pressure and cool dry air cover the nation from the Mississippi River west to the Pacific coast. Centers of high pressure are located over eastern Montana and northern Utah. Gulf moisture is blocked from the central plains by this high and is expected to continue to dominate the weather over the central plains through Monday night.

This means that skies will continue clear to occasionally partly cloudy with no precipitation through Monday over the Nebraska-Iowa region. There will be little change in temperatures in eastern Nebraska and western Iowa Monday, but it will be a little warmer in western Nebraska.

By GENE BUDIG  
Outstate Nebraska Bureau  
Columbus — Larrell Aikins couldn't wait for that first shot.

"I'd been waiting for months," recalled the wild-eyed hunter.

His chance came early one morning near Jackson, Wyoming.

Related Aikins:  
"I got up extra early that morning . . . couldn't sleep too well . . . kept seeking elk in my sights.

"First I checked my rifle; it was OK.

"Then I got dressed and strapped my revolver to my side. I brought it just to make sure the big one didn't get away.

"As I bent over to get out of the tent, the hammer of my pistol hit a tent post.

"Next thing I knew, the hunt was over."

His companions hurried him to a Jackson hospital where doctors admitted he had hit the bulls-eye.

The bullet had shattered the bone in his right leg in a couple of places.

"What a way to go," grumbled the Columbus photographer, who said the pistol was a .357 magnum.

He quickly inserted, "Police use these pistols to break motor blocks . . . they're deadly."

Between hops to the cash register, Aikins told of plans for another hunting venture to Wyoming.

"I should be up and around in a month or so," he said. "In the meantime, I'll be dreaming again."

Only this trip, he noted, will see more than one shot.

"The pistol will go back too," Aikins added. "But there won't be a live round under the hammer."

## Sheet Metal Strike Here Said Settled

erous charges such as drunk, vagrancy, loitering, and sex offenses.

"The man's total possessions consisted of the clothes on his back and what he had in his pockets — an old billfold (containing no money), shaving gear, and a bar of soap."

"In his billfold were a Social Security card and several 'wisdom writings,' most of them getting rather perverted," said Neely.

"When you ask one of these guys for identification, the first and sometimes only thing they will show you is a social security card," said Maxey.

The officers said not all bums are men. "Every once in a while you'll find a woman bum. She is usually with three or four men."

Although most of the men found at "Hotel D'Hobo" come from out-of-town, a few local men are also found there. But, Neely noted:

"The local bums aren't as apt to give you the criminal problems that the wandering element will."

### Bottles, Jars, Peels

Inside the "hotel" are empty wine, beer and whiskey bottles of every size and shape, "girlie" magazines, banana peels and discarded clothing.

While Lincoln sleeps, "Hotel D'Hobo" is alive. The men tell stories. They fight. They drink. "They drink anything containing alcohol," Neely said, "including lemon extract, vanilla, 'canned heat,' vinegar, shellac thinner, cheap wines and liquors."

Police, despite almost nightly checking of the flophouses, cannot discourage the steady stream of transients.

Recently Neely and Officer Richard Ebert found two transients asleep on the lawn in the rear of one of the houses. A third traveler was

## 4 Republicans Probe, Praise Barry's Aims

By NANCY RAY  
Star Staff Writer

Four Republicans, three of them Lincoln lawyers, probed and praised the political aspirations of Arizona Sen. Barry Goldwater in a Sunday panel discussion on "If Goldwater, Then What?"

Attorney Wallace Richardson commented that Goldwater's try for the Republican nomination for president "could lead to a serious setback to the conservative viewpoint if he were defeated."

Goldwater would lose much of his appeal and power as a spokesman for the conservative element if his try for the presidency is thwarted, and should remain a U.S. senator, Richardson said.

### 'Back To Center'

Richardson, who replaced Lt. Gov. Dwight Burney as a panelist, said that Goldwater would have to "modify his views and move back more to center" if he is to become a serious candidate for the presidency.

Mrs. Hal Hasselbalch, a member of the state Young Republicans executive committee, voiced her strong support of Goldwater as a presidential candidate.

"Sen. Goldwater is probably the only potential presidential candidate who has made his views crystal clear before his nomination," Mrs. Hasselbalch said.

### Afraid Of Kennedys

The senator, she commented, "is receiving a groundswell of backing from the people who fear the Kennedys."

"Republicans have compromised their party principles for 25 years at convention time on the belief that the moderate candidate can win," she said, adding that it was

time for a clear delineation between the platforms of the Republican and Democratic Parties.

Attorney Roger Dickeson noted that the Arizona senator "is now assiduously engaged in moderating his position."

### Several Changes

Dickeson listed several instances in which Goldwater's stands on Cuba, taxation and government spending had changed, and added that "in enunciating his policies, he has done so in such broad terms that it is difficult to disagree with him."

He also said that the senator "is often guilty of shooting from the lip" before considering the facts of a situation.

Attorney F. Butler Shaffer, former executive secretary of the state Republican Party, said he "would consider a Goldwater administration as a potential and important first step toward a truly free nation."

### Live For Self-Interest

He defended Goldwater's stand that "one man's need is not another man's obligation," explaining that "each individual has a complete right to live for his own self-interest, if he does not use force against others."

Shaffer criticized Richardson's stand that Goldwater was more effective as a spokesman for the conservative view than as a candidate, and Richardson replied that "I am a political realist."

The panelists also parried questions phoned in to radio station KF MQ, which carried the 75-minute debate. Discussion leader for the session was Dr. Carl Schneider, chairman of the University of Nebraska political science department.

ASLEEP . . . hobo in abandoned house.

curled up on a dusty old moth-eaten sofa. He was sharing his nap with several crawling and flying insects. All three men were drunk.

### Knows The Routine

Neely and Ebert had to escort two found sleeping in the grass, while the third — very accustomed to the routine of being found in the houses — staggered along to the police cruiser.

Next morning the trio

pleaded guilty in Municipal Court to charges of being drunk. All three sat out the fine in jail. The same afternoon they were released, Neely found the staggerer from the sofa at the same house again, drunk.

"He's almost a permanent resident at the station," said one policeman.

THE EXTRA CARE AIRLINE

# Black Day For Bachelorhood

By WILLIAM O. DOBLER

Some centuries ago in Scotland, the upcoming year would have been one for very grave concern on the part of free and happy bachelors. They would be facing up to another year divisible by four and it could well be the undoing of many of them. Perhaps a year divisible by four means nothing to you but this is only because you fail to recognize it in such garb. Any such year, except centesimal years that are not divisible by 400, is a leap year and 1964 is one.

In 1288 in Scotland, a law was passed which gave women the right to propose marriage to the men of their choice. The fellow had to accept or face a fine, based on the size of his material possessions, unless he could show he was betrothed to another woman. Not being too familiar with things as they existed in Scotland way back then, we cannot say how effective the law was, but how might that kind of a law work today? The only catch in it would seem to be the risk of refusal that Milady would have to run. She might make her proposal but would she press for the fine if she were met with a refusal?

To do so would call for a public admission of the refusal, a shattering of pride for which any fine would be questionable recompense. The better question today is whether there is even any such need or call for such a law. Any honest male would have to admit that the woman of today has progressed in the art of pursuit to the point where the use of law would be most unsophisticated.

And what about leap year? Obscure in its historic support but still a subtle part of human relationships today is the quaint idea that leap year is still the one-in-four-shot that women get to assert themselves. Some lucky fellows undoubtedly were married in leap year and, thus, can always boast that it was their wives who caught them, not vice versa.

Even the Associated Press has taken cognizance of the importance of the upcoming year. It has noted that one American designer has gone all out to make it easy for the girls in 1964. He has done this with fashion designs aimed at bringing out the femininity in women. The designer's show was reported centered about the "provocative woman" who will be, in new spring fashions, a far cry from the past season's lady of style. "For example," says the AP, "there are flounces of black Chantilly lace over flesh pink, which look more like boudoir costumes than date dresses. It would

be impossible not to attract attention with vivid pastel linen jacket costumes, other bright hues as linings and still others as blouses . . . And the date-bait collection was fussy and feminine with ruffles on necklines, hemlines, cuffs, and all the way down the middle of dresses and blouses."

Right off the bat, there is one saving feature for all men. Few of them know what the fashion people are talking about when they come up with such descriptions. Thus, it will, if it works, be a case of the men never knowing what hit them. That, of course, will be highly unusual since men are always acutely aware of what is happening to them when it comes to their dealings with the opposite sex. Does the husband who boasts of being caught in leap year really believe this? Of course not. He knows that things came about exactly as he planned them and that he was always the master of the situation.

Does the average man really believe that he has been tricked in some way when he buys a new house, agrees to remodel the old one or modernizes the kitchen? Of course not. This may be the impression he leaves but he knows full well what he is doing and does it with deliberation and forethought.

Is the husband fooled when the wife explains that she saved him money because of the sale price at which she purchased a new hat? Not at all. He certainly is smart enough to know that a net loss is a net loss and smugly lets his wife think she has outsmarted him. Thus, all she has is a new hat but he has, uh, well, uh, he has, uh, you know—at any rate, he isn't complaining.

And then, there is the question of who runs the house. Any husband true to his calling knows full well that he is the boss and what he says goes. But again, he is clever about this, doesn't go to extremes so that the matter ever becomes a real issue. After all, when he is in control of things, he can see no sense in upsetting the applecart. Thus, he leaves small matters up to the decision of others, such as his wife. Let her pick the colors of a room, what time the kids are to come in at night, which kind of car to buy and when to buy it and other such minor things.

But when the really big problems come along, he is sure in his knowledge and authority. Naturally, such problems cannot be spelled out since they are always of the unexpected and highly complicated variety. Laws, leap year, fashions—what is their place? The answer to that we don't know and are not even sure we want to know.

## On Swampy Ground

No one can discount the formidable possibilities resulting from the Legislature's misadventures in the field of time sales and small loan finance. It has required a special session to pick up the pieces after the Supreme Court declared unconstitutional both the 1959 and 1963 installment sales acts.

The only prudent guideline from here on is a healthy respect for constitutional principles, lest past errors be compounded. A warning appears in LB19 which last week received a 35-2 initial floor approval. It seeks to validate all contracts written in compliance with an unconstitutional law. This bizarre suggestion was offered by the small loan industry. It is rubbery enough to call for a hard second look.

A statute declared unconstitutional is no law. It never qualified as one even though it may have been in use for some while before it failed its test. It takes a considerable stretch of the imagination to conclude otherwise.

An attempt to redeem desired portions of a collapsed statute or its consequences could amount to an excursion into the field of the judiciary, that is, to pass a law over the head of the Supreme Court. The Nebraska constitution is clear and specific on this. Section 1 of Article 2 states that "the powers of government of this state are divided into three distinctive departments, the legislative, executive and the judicial, and no person or collection of persons shall exercise any power properly belonging to either of the others . . ."

The Legislature is strongly advised to seek dispassionate, learned legal council before it proceeds further with this curious proposal. In Lincoln as a part of the University of Nebraska's aerospace science week, Lt. Col. John A. Powers of the National Aeronautics and Space Administration cited the importance of this nation's work in reaching the moon. As he described the situation, the important point is not just what happens or what we find once we land on the moon.

This, of course, could be very important but there are many other considerations. Without this effort at conquering space, the United States would find itself lagging in overall technology. As valuable as the moon project itself will be the scientific knowledge and understanding we acquire as a result of pursuing this project.

But what about specifics? Exactly what can we expect out of all this moon business? Some idea of it can be obtained in an easy-to-understand way through a report in the last issue of Changing Times

## We're Against It

A biological scientist, addressing a national medical meeting, recently predicted that in the calculable future we can expect laboratory-produced human organs.

A human spare parts business is an exciting prospect, feeding the hope of greater longevity and just about the ultimate in our long drawn out war against degenerative diseases. It also suggests formidable complications.

While it would be a great experience to be measured up for a new alimentary tract, knowing that would take care of what ailed us, there would also be the dubious fact that the world's tyrants would be first in line. A Nero would be around for hundreds of years committing all sorts of abusive acts. No one could outlive his competitor, and child bearing would have to be abolished. Progress would largely stop.

Our democratic processes would be sufficient to cope with tyrants, who could be defeated for office, but our affluent society would lead to other serious excesses. The fashion arbiters would get busy. One year our insides would have to be azure blue, the next year flaming orange. Some artful scientist would develop an hour glass stomach with a one year guarantee of a perfect figure. Of course, there would be planned obsolescence and higher prices. The tax gatherer who, by now, has managed to levy on everything on the outside would move inside and we would all be caught again.

All that would be bearable, but the whole thing would be self-defeating. Someone would start the sad of buying sharper minds and the consuming public would get too sensible to squander its money. Then our whole economy would come down in a heap and we would be back in the trees again.

"And There's Another Gray Hair For Civil Rights . . . And Another For Foreign Aid . . . And The Tax Cut . . . And . . ."

DREW PEARSON

## Free Speech Proves A One Way Street

Washington — When Gov. Ross Barnett of Mississippi was invited to speak at Princeton University it was the students who defended his right to speak. But when sixty students from another Ivy League college, Yale, flew to Mississippi to campaign for the Negro candidate for governor, they found that the governor gave no reciprocal right of free speech and political activity.

The story of their attempts to campaign for Dr. Aaron Henry, a Clarksdale druggist, and the first Negro to run for governor since reconstruction days, has not been a happy one. Twenty-two were arrested in Indianola, Miss., for distributing copies of the Mississippi Free Press. Four were hauled out of bed in Hattiesburg for sleeping in the Negro section of the city. Several have been stopped and detained on suspicion of driving stolen cars.

This latter has been the most effective police tactic used against Yale-in-Mississippi, because the students have flown South in relays and are dependent on the use of cars supplied by their friends. When they show police the registration cards of the car-owners they are detained for questioning. And the local police have learned to spot the cars when driven by white students through Negro sections of Mississippi cities or pick them up just as they are en route to political meetings.

Thus attending a political meeting is a very precarious business—if you are campaigning for Negro candidate Henry.

In addition, several Negroes have become terrorized by police threats and have withdrawn permission to use churches for local meetings. Admiral Hyman G. Rickover, father of the atomic submarine, has received many honors, including the medal of honor, but the other day he received a unique reward for something which used to get him into trouble with the Navy—speaking out.

At one time the Navy almost failed to promote Rickover because he was so outspoken. He criticized Navy red tape, goaded his superior officers until they finally built an atomic submarine. Today the Navy is secretly proud of Rickover though his speeches carry this Navy notation at the top: "This speech reflects the views of the author and does not necessarily reflect the views of the secretary of the Navy or the Department of the Navy."

The award which Rickover received came from Dan T. Moore, president of the International Platform Association, the professional organization of lecturers and speakers which encourages free discussion, and which gave the outspoken admiral a beautiful silver bowl in recognition for his statement: "The first line of defense is education."

## Problem: What To Do With A Left-Over Day

NEW YORK — Couldn't sleep a wink last night worrying about that whole day we're going to gain by the year 4900.

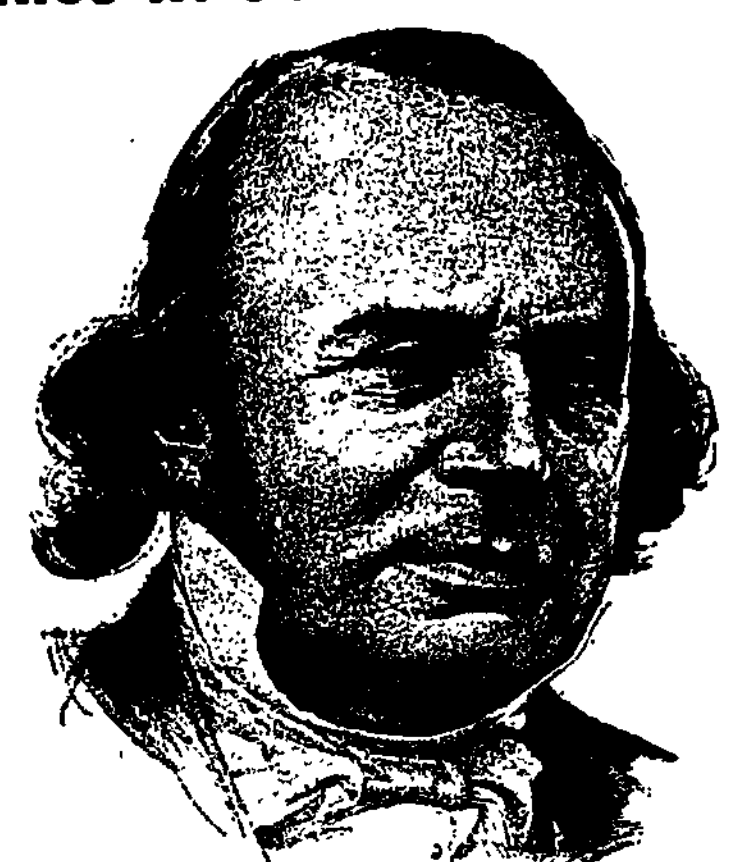

Unless something is done right now (we're picking up 26 seconds a year, and you know how that can mount up), we're going to be stuck with this complete 24-hour day when that aforementioned year rolls around, if the day fully ripens in January of that year, will there be a January 32, 4900? or a November 31? And what will it do to all those watches which tell you not only the time but the day of the week and the month?

This unnerving question was raised recently at the Ecumenical Council. The Fathers voted 2,057 to four that the Catholic Church would be happy to go along with any efforts through the world to get the calendar lined up with the sun and with earth's orbits around our little star. Our calendars are running about two seconds slow a month.

Western man, by and large, has been operating off a calendar decreed by Pope Gregory XIII in 1582. It was a rewrite, so to speak, of the Julian calendar, decreed by Julius Caesar in 46 B.C. Perhaps after some needling from Cleopatra—for Big Julie based his calculations on a much earlier Egyptian calendar. (See Cleopatra's Needles, in any standard reference work.)

Julius decided that a year was 365 days and six hours. He divided those days into 12 parts, named months, and was modest enough to name only July after himself. He had a spare day to account for every four years, through

## Profiles In Science

Almost alone among the great naturalists of the 19th century, Jean Louis Rodolphe Agassiz (1807-1873) refused to accept the "Darwinian" theories of the evolution of plants and animals.

It has often been wondered why. Some writers think the reason was his intense religious feelings, which led him to consider each living thing as an individual "thought of God." Most theologians teach now that Darwinian evolution, with its "struggle for existence" and its "survival of the fittest," was the means God chose to bring into being the genera and species we know today and those now extinct.

The reason for Agassiz' lack of enthusiasm for Darwinism, which other scientists seized upon with avidity, may have been the result of his youthful friendship with Georges Cuvier, the great French paleontologist, who coined the word "biology." Cuvier held that differentiation of species was the result of catastrophic geologic and climatic changes, such as ice ages, floods and earthquakes. It is indeed possible that Agassiz may have felt it would be disloyal to his old friend and benefactor to accept Darwinism wholeheartedly.

Agassiz was born in Switzerland. After taking a medical degree at his father's wish, he became famous as an ichthyologist, a student of fishes, when only 22. He published a complete work on Brazilian fish without ever having been to Brazil. The

book was the result of his superb classification of a collection of fishes made by a German scientist who had died before his work could be completed. The young Agassiz finished the compilation at the request of the scientist's colleague.

Agassiz also became a famous geologist. From studying glaciers, he came to believe that much of the northern hemisphere had been covered with ice in comparative recent geologic times.

In 1846, he came to the United States and became professor of zoology at Harvard. He was the most fa-

mous teacher of his time, and it was he who made field trips a part of every natural history class.

"If you study Nature only from books, when you go outside you cannot find her," he said.

In the United States, he studied and wrote books about Lake Superior, the fishes that live in the surf of the Pacific Coast beaches and the natural history of the United States.

When he died, a boulder from a Swiss glacier was brought to this country and was set up as his tombstone in a Cambridge graveyard.

PIERRE J. HUSS

## Reds Experts In 'Gimmick' Diplomacy

NEW YORK — The rat race in armaments between the East-West powers in 1963 has demonstrated once more that everybody talks about general and complete disarmament, but that is all except for some gestures and political expedients calculated not to interfere with the tactics of either side.

Thus the United States is firmly and wisely sticking to disarmament proposals which it adopted and carried through over long years would safeguard its national security. The Soviet Union is sticking to propaganda devices and proposals which if adopted would strip the Western allies of nuclear and conventional striking power while leaving the Soviet Union free to prepare a knock-out blow by clandestine arming based on cheating.

Fundamental progress toward genuine disarmament has been non-existent in the current year and present indications are that it will remain on dead center in 1964. The test ban treaty and the pledge between the U.S. and Russia to outlaw the orbiting of nuclear warhead vehicles are political expedients outside the field of "disarmament." The best that can be said is that this "pause in the cold war" has facilitated the process of bringing the East-West blocs back to the Geneva conference table in January for the next sessions of the 18-nation UN Disarmament Committee.

Under these circumstances, each side makes sure that its proposals on disarmament draw worldwide attention and score the most favorable impact. In this game of wits and political pantomime, the Soviet Union has the advantage over the U.S. and its allies—the communists can dress up their disarmament proposals in pious offers garnished with alluring promises baited to attract the pacifist nations. The Soviet Union, of course, does not have to worry about its legislature or public—no senate with power to scrutinize each provision in a proposal which would involve national security and commit the nation to curbing its defense potential.

If anything, the periodic sessions at Geneva and in UN on disarmament reveal the intentions and tactics of both the East and West blocs. The current debate in the UN Assembly has demonstrated so far that Nikita Khrushchev has no intention of making basic concessions such as agreeing to international inspection teams on his territory. These teams would verify that the provisions of agreements and treaties like the test ban are being complied with and that there is no preparation for a surprise attack. The U.S., Britain and France will accept no other kind of guaranty and safeguard, which leaves the deadlock on disarmament

where it was 15 years ago. The Soviet Union has been adept at "gimmick" diplomacy in camouflaging its unwillingness to join in any disarmament steps except those on communist terms. A popular device flung at the Western powers again and again in past years has been proposing the creation of nuclear free zones.

Moscow started the ball rolling on such a gimmick by steering into UN the so-called Rapacki Plan. This scheme, authored by the Polish foreign minister, Adam Rapacki, would exclude nuclear weapons from West Germany, East Germany, Poland and Czechoslovakia. That missiles carrying nuclear warheads are fired and put on target from hundreds or up to 6,000 miles away was not mentioned in the presentation of the Rapacki Plan, an omission overlooked by the neutrals in their eagerness to support any and all steps to disarmament.

The Rapacki Plan was a signal to Communist China and Marxist Indonesia to pop a similar proposal into UN for a nuclear free zone in Asia and the Pacific, followed by Latin American demands for ruling out nuclear weapons in their areas. Two years ago the assembly was pushed into adopting a recommendation that Africa be declared off limits to nuclear weapons.

Soviet smiles suddenly turned to frowns a few days ago when the United States at long last bluntly declared its opposition to nuclear free zones on the contention that they would upset the military balance and in Europe, for instance, lay West Germany's eastern frontier open to easy attack by the Soviet Union and Poland. The Soviet Union bristled and was exasperated by a further UN statement that any plan for a nuclear free zone must contain "adequate inspection" provisions.

TAXPAYER

But the Soviet Union is never discouraged by one setback. Through its satellites, it is now spinning the "nuclear umbrella" gimmick. It replaces the previous Moscow demand that disarmament begin with the destruction of all nuclear weapons. Now it proposes that the nuclear powers limit the number of nuclear powers held in stock, a move which if adopted without rigid inspection and verification systems would leave the Soviet Union in a wonderful position to blast the U.S. some day from the face of the earth.

Perhaps, when all is said and done on disarmament, the only sane procedure for us is to keep on talking with the Russians and let them demonstrate by their own transparent actions that disarmament is just another communist instrument for propaganda and worldwide deception.

## Your Five Cents Worth Military Pay

Lincoln, Neb. The average tired and overburdened citizen—and this includes the multitude—cannot help but sigh at the news stories that tell that there are again proposals to increase the pay of the military's top brass. Salaries and other benefits, including retirement pay, are so lopsided now among the officers in our military ranks that it is almost unbelievable. The 20-year plans enable them to retire while still young men, and coast along on a soft financial cushion the rest of their days.

If any pay increases were to be divided up among the enlisted men, who surely need and deserve them, the taxpaying citizen would look with more favor upon such proposals.

## OFF THE RECORD By Ed. Reed

"And I'd like to see his physical fitness program lay an egg, too."

# Black Day For Bachelorhood

By WILLIAM O. DOBLER

Some centuries ago in Scotland, the upcoming year would have been one for very grave concern on the part of free and happy bachelors. They would be facing up to another year divisible by four and it could well be the undoing of many of them. Perhaps a year divisible by four means nothing to you but this is only because you fail to recognize it in such garb. Any such year, except centesimal years that are not divisible by 400, is a leap year and 1964 is one.

In 1288 in Scotland, a law was passed which gave women the right to propose marriage to the men of their choice. The fellow had to accept or face a fine, based on the size of his material possessions, unless he could show he was betrothed to another woman. Not being too familiar with things as they existed in Scotland way back then, we cannot say how effective the law was, but how might that kind of a law work today? The only catch in it would seem to be the risk of refusal that Milady would have to run. She might make her proposal but would she press for the fine if she were met with a refusal?

To do so would call for a public admission of the refusal, a shattering of pride for which any fine would be questionable recompense. The better question today is whether there is even any such need or call for such a law. Any honest male would have to admit that the woman of today has progressed in the art of pursuit to the point where the use of law would be most unsophisticated.

And what about leap year? Obscure in its historic support but still a subtle part of human relationships today is the quaint idea that leap year is still the one-in-four-shot that women get to assert themselves. Some lucky fellows undoubtedly were married in leap year and, thus, can always boast that it was their wives who caught them, not vice versa.

Even the Associated Press has taken cognizance of the importance of the upcoming year. It has noted that one American designer has gone all out to make it easy for the girls in 1964. He has done this with fashion designs aimed at bringing out the femininity in women. The designer's show was reported centered about the "provocative woman" who will be, in new spring fashions, a far cry from the past season's lady of style. "For example," says the AP, "there are flounces of black Chantilly lace over flesh pink, which look more like boudoir costumes than date dresses. It would

be impossible not to attract attention with vivid pastel linen jacket costumes, other bright hues as linings and still others as blouses. . . . And the date-bait collection was fussy and feminine with ruffles on necklines, hemlines, cuffs, and all the way down the middle of dresses and blouses." Right off the bat, there is one saving feature for all men. Few of them know what the fashion people are talking about when they come up with such descriptions. Thus, it will, if it works, be a case of the men never knowing what hit them. That, of course, will be highly unusual since men are always acutely aware of what is happening to them when it comes to their dealings with the opposite sex. Does the husband who boasts of being caught in leap year really believe this? Of course not. He knows that things came about exactly as he planned them and that he was always the master of the situation.

Does the average man really believe that he has been tricked in some way when he buys a new house, agrees to remodel the old one or modernizes the kitchen? Of course not. This may be the impression he leaves but he knows full well what he is doing and does it with deliberation and forethought.

Is the husband fooled when the wife explains that she saved him money because of the sale price at which she purchased a new hat? Not at all. He certainly is smart enough to know that a net loss is a net loss and smugly lets his wife think she has outsmarted him. Thus, all she has is a new hat but he has, uh, well, uh, he has, uh, you know—at any rate, he isn't complaining.

And then, there is the question of who runs the house. Any husband true to his calling knows full well that he is the boss and what he says goes. But again, he is clever about this, doesn't go to extremes so that the matter ever becomes a real issue. After all, when he is in control of things, he can see no sense in upsetting the applecart. Thus, he leaves small matters up to the decision of others, such as his wife. Let her pick the colors of a room, what time the kids are to come in at night, which kind of car to buy and when to buy it and other much minor things.

But when the really big problems come along, he is sure in his knowledge and authority. Naturally, such problems cannot be spelled out since they are always of the unexpected and highly complicated variety. Laws, leap year, fashions—what is their place? The answer to that we don't know and are not even sure we want to know.

## Real Boss At Home

## On Swampy Ground

No one can discount the formidable possibilities resulting from the Legislature's misadventures in the field of time sales and small loan finance. It has required a special session to pick up the pieces after the Supreme Court declared unconstitutional both the 1959 and 1963 installment sales acts.

The only prudent guideline from here on is a healthy respect for constitutional principles, lest past errors be compounded.

A warning appears in LB19 which last week received a 35-2 initial floor approval. It seeks to validate all contracts written in compliance with an unconstitutional law. This bizarre suggestion was offered by the small loan industry. It is rubbery enough to call for a hard second look.

A statute declared unconstitutional is no law. It never qualified as one even though it may have been in use for some while before it failed its test. It takes a considerable stretch of the imagination to conclude otherwise.

An attempt to redeem desired portions of a collapsed statute or its consequences could amount to an excursion into the field of the judiciary, that is, to pass a law over the head of the Supreme Court. The Nebraska constitution is clear and specific on this. Section 1 of Article 2 states that "the powers of government of this state are divided into three distinctive departments, the legislative, executive and the judicial, and no person or collection of persons shall exercise any power properly belonging to either of the others. . . ."

The legislature is strongly advised to seek dispassionate, learned legal council before it proceeds further with this curious proposal.

## Our Future On The Moon

In Lincoln as a part of the University of Nebraska's aerospace science week, Lt. Col. John A. Powers of the National Aeronautics and Space Administration cited the importance of this nation's work in reaching the moon. As he described the situation, the important point is not just what happens or what we find once we land on the moon.

This, of course, could be very important but there are many other considerations. Without this effort at conquering space, the United States would find itself lagging in overall technology. As valuable as the moon project itself will be the scientific knowledge and understanding we acquire as a result of pursuing this project.

But what about specifics? Exactly what can we expect out of all this moon business? Some idea of it can be obtained in an easy-to-understand way through a report in the last issue of Changing Times

magazine. Many developments of the space program already have been adapted to industrial uses. Progress in the space race has brought new innovations in the hat-making industry, in elevator, helicopter and airplane operations, has greatly advanced the field of electronics and has advanced the field of communications.

"Space medicine," says Changing Times, "has produced new methods of physical checkups and diagnoses. New kinds of equipment—such as pressurized chambers for medical emergencies, cardiac stimulators for heart patients, better hearing aids—are in use, all products of space research. Scientists foresee curtailment of water and air pollution stemming from development of 'closed cycle life-sustaining systems' for astronauts."

As Colonel Powers said, not even the sky is the limit, anymore. There just is no limit.

## We're Against It

A biological scientist, addressing a national medical meeting, recently predicted that in the calculable future we can expect laboratory-produced human organs.

A human spare parts business is an exciting prospect, feeding the hope of greater

longevity and just about the ultimate in our long drawn out war against degenerative diseases. It also suggests formidable complications.

While it would be a great experience to be measured up for a new alimentary tract, knowing that would take care of what ailed us, there would also be the dubious fact that the world's tyrants would be first in line. A Nero would be around for hundreds of years committing all sorts of abusive acts. No one could outlive his competitor, and child bearing would have to be abolished. Progress would largely stop.

Our democratic processes would be sufficient to cope with tyrants, who could be defeated for office, but our affluent society would lead to other serious excesses. The fashion arbiters would get busy. One year our insides would have to be azure blue, the next year flaming orange. Some artful scientist would develop an hour glass stomach with a one year guarantee of a perfect figure. Of course, there would be planned obsolescence and higher prices. The tax gatherer who, by now, has managed to levy on everything on the outside would move inside and we would all be caught again.

All that would be bearable, but the whole thing would be self-defeating. Someone would start the fad of buying sharper minds and the consuming public would get too sensible to squander its money. Then our whole economy would come down in a heap and we would be back in the trees again.

That missiles carrying nuclear warheads are fired and put on target from hundreds or up to 6,000 miles away was not mentioned in the presentation of the Rapacki Plan, an omission overlooked by the neutrals in their eagerness to support any and all steps to disarmament.

The Rapacki Plan was a signal to Communist China and Marxist Indonesia to pop a similar proposal into UN for a nuclear free zone in Asia and the Pacific, followed by Latin American demands for ruling out nuclear weapons in their areas. Two years ago the assembly was pushed into adopting a recommendation that Africa be declared off limits to nuclear weapons.

Soviet smiles suddenly turned to frowns a few days ago when the United States at long last bluntly declared its opposition to nuclear free zones on the contention that they would upset the military balance and in Europe, for instance, lay West Germany's eastern frontier open to easy attack by the Soviet Union and Poland. The Soviet Union bristled and was exasperated by a further U.S. statement that any plan for a nuclear free zone must contain "adequate inspection" provisions.

TAXPAYER

But the Soviet Union is never discouraged by one setback. Through its satellites, it is now spinning the "nuclear umbrella" gimmick. It replaces the previous Moscow demand that disarmament begin with the destruction of all nuclear weapons. Now it proposes that the nuclear powers limit the number of nuclear powers held in stock, a move which if adopted without rigid inspection and verification systems would leave the Soviet Union in a wonderful position to blast the U.S. some day from the face of the earth.

Perhaps, when all is said and done on disarmament, the only sane procedure for us is to keep on talking with the Russians and let them demonstrate by their own transparent actions that disarmament is just another communist instrument for propaganda and worldwide deception.

## Your Five Cents Worth Military Pay

Lincoln, Neb. The average tired and overburdened citizen—and this includes the multitude—cannot help but sigh at the news stories that tell that there are again proposals to increase the pay of the military's top brass. Salaries and other benefits, including retirement pay, are so lopsided now among the officers in our military ranks that it is almost unbelievable. The 20-year plans enable them to retire while still young men, and coast along on a soft financial cushion the rest of their days.

If any pay increases were to be divided up among the enlisted men, who surely need and deserve them, the taxpaying citizen would look with more favor upon such proposals.

# Scouts, Cubs Study Rules For Good Bike Riding Practices

WAYNE SPRINGER . . . checks rules, FINDS . . . he should NOT have seat too high, handlebars too low, SHOULD . . . make adjustments to fit his body properly.

RIGHT . . . stopping for stop sign. WRONG . . . riding double, or with two bikes abreast. RIGHT WAY . . . signaling for turn into driveway.

By GERRY SWITZER  
Star Staff Writer

Booklets on bicycle safety and maintenance are being distributed to all Boy Scouts and Cubs in the Cornhusker Council as part of a national Scout program to promote in-

creased awareness of safety among bicycle riders.

Bicycling, being at its all-time peak of popularity with more than 23 million bike riders in the United States, results in some 400 fatalities annually.

The purpose of the booklet is to remind bike riders of good safety practices in an attempt to decrease the number of deaths and injuries.

The booklet points out that the most frequent traffic violation is bike riders riding on

the wrong side of the street.

Contrary to the rule that pedestrians in a roadway should walk on the left side facing traffic, bicycle riders must stay to the right—the same direction as other vehicles.

Other rules of the safety code listed in the booklet include:

- Do not carry passengers.
- Slow down, look, listen at all intersections and drive-ways.
- Observe all traffic laws.

- Use hand signals.
- Ride single file.
- Keep both hands on the handlebars.
- Be equipped for night riding.
- Do not speed in busy sec-tions.

- Give right-of-way to pedes-trians, cars and trucks.

Keeping tires properly in-flated, seats and handlebars adjusted to fit the rider, brakes adjusted, spokes re-placed, wheels aligned and all parts tight and clean are em-phasized.

## West Will Resist If Soviets Renew Autobahn Harassing

Berlin (AP) — The Western allies will resist further Soviet harassment of their military traffic on the Berlin Autobahn in the near future, an informed source said Sunday.

"This argument has not yet been settled," a Western official said. "Our plans are based on the expectation of more trouble in the near future. The Russians don't give up that easily. We have made our point, and our convoys have gone through. But

there's no indication the Soviets are prepared to accept that situation."

More convoys are expected to roll along the 110-mile line to the West in the coming week. Any day a convoy moves can bring trouble, if the Soviets feel inclined to be balky.

Four Hours Notice

In accordance with normal military procedure, the Western allies do not announce troop moves in advance. They do give the Soviets four hours

notice if a big convoy is scheduled, so the appropriate officers can be on hand to process them.

The quarrel comes down to the Soviet claim to call all the shots on the Autobahn. The United States, Britain and France insist they have the right to move on it as they like.

The Russians say that they have to count the soldiers moving over the road. The Western allies agree but they decide what facilities are made for counting them.

The Soviets complain they can't see to count men inside a dark truck. They demand that the truck tailgates be lowered. The allies refuse to do so.

## Grace Lutheran Chooses Three Council Members

Don E. Meyer, S. C. Vierk and Virgil A. Johnson were elected council members of the Grace Lutheran Church at the fall congregational meeting Sunday night.

The 1964 budget was adopted, calling for \$63,890, including \$20,000 for benevolences and the balance for current expense and improvement.

## Missouri Crash Kills Nebraskan

Excelsior Springs, Mo. (AP) — Everett Leroy Eckley, 69, of Tekamah, Neb., was killed Sunday in a collision between his car and a freight train on Missouri 92, four miles northwest of Excelsior Springs.

His car crashed into the side of the train. Eckley was a substitute mail carrier.

## Moro Expected To Get Call In Italy

Rome (UPI) — President Antonio Segni is expected to ask Aldo Moro Monday to take over as premier of Italy but a power struggle within the Christian Democratic Party may delay action.

Moro, the Christian Democratic Party secretary, is pledged to let the left wing Socialists join in forming a center-left government.

However, the right wing of his own party is opposed to accepting the Socialists in the cabinet.

Partners

If Moro is selected Monday as expected, he will begin talks with the Social Democrats and Republicans, the other partners in the proposed center-left alliance.

They will thrash out terms for negotiating with the So-

cialists, and by mid-week Moro is expected to begin his talks with the Socialists.

Political leaders hoped the talks would be finished by the end of the week.

Quiet Fight

As a result, a quiet but determined fight within the party is under way. It had been expected that Segni would call on Moro Saturday. But apparently the intra-party dispute held up the call.

The political situation was further complicated by threats of Communist violence. They have called a general strike in Rome on Tuesday to protest the high cost of living.

Police were alerted for any signs that the rally could

## East Germans Label Swede 'Underground Railway' Man

Berlin (UPI)—East German Communists Sunday accused a Swedish clergyman of running an "underground railway" for East Berlin refugees to the West.

The East Berlin Sunday newspapers published a protest note from the East German foreign ministry to the Swedish government warning that Pastor Heribert Jansson faced arrest if he entered East Berlin again.

The protest claimed Jansson had smuggled at least six East Berliners to West Berlin under cover of diplomatic passports.

It also accused Jansson of smuggling Western goods and currency into East Berlin.

Attached To Consulate

The pastor, who is attached to the Swedish consulate in West Berlin, refused to com-

ment on the charges. A spokesman for Consul General Oosten M. Lundborg said any comment would come from the foreign office in Stockholm.

The East German note was transmitted to the Swedish ambassador in Warsaw through the Polish foreign office, since Sweden does not have diplomatic relations with East Germany. It was not known if the ambassador accepted or rejected the note.

The note said that on Oct. 7 Jansson made several trips in his car with diplomatic number plates through the communist wall and had "illegally taken four citizens of the German Democratic Republic to West Berlin."

It claimed all four were facing trial for unspecified offenses in East Berlin.

## Asthma Formula Prescribed Most By Doctors—Available Now Without Prescription

**Stops Attacks in Minutes . . . Relief Lasts for Hours!**

New York, N. Y. (AP)—The asthma formula prescribed more than any other by doctors for their private patients is now available to asthma sufferers without prescription.

Medical tests proved this formula stops asthma attacks in minutes and gives hours of freedom from recurrence of painful asthma spasms.

This formula is so effective that it is the physician's leading asthma prescription—so safe when used as directed that now it can be sold without prescription in most states

The note said that on Oct. 7 Jansson made several trips in his car with diplomatic number plates through the communist wall and had "illegally taken four citizens of the German Democratic Republic to West Berlin."

It claimed all four were facing trial for unspecified offenses in East Berlin.

**Box Turned Down**

On one occasion, an American offered a Soviet officer a box to stand on. He turned it down.

On Oct. 29 the United States, Britain and France notified the Soviets of some rules they had agreed on: The men would get down and be counted if there were more than 30 — not including drivers and co-drivers. They wouldn't get down if it was raining. They would drop tailgates if the tailgates were more than six feet high — which they aren't, at least on the 2½ ton trucks.

# Coed Is Bride-Elect

This morning Mrs. Jack G. Thompson of Omaha makes announcement of the engagement of her daughter, Vicki, to John McIntyre, son of Mr. and Mrs. Dorsey G. McIntyre of Lincoln. Miss Thompson attended the University of Iowa for

two years, and now is a student at the University of Nebraska. She is a member of Alpha Delta Pi sorority. Mr. McIntyre is a senior at the University of Nebraska where he is a member of Delta Upsilon fraternity.

## BRIDES

Plans for a late November wedding are being made by Miss Jan Bloom of Kansas City, Mo., daughter of Mr. and Mrs. C. E. Bloom of Lincoln, whose betrothal to Dale D. Harkins of Colby, Kan., was revealed earlier this fall.

The bride-elect, who will return to Lincoln on Nov. 15, has announced that the wedding will take place on Saturday, Nov. 30, and the ceremony will be solemnized in Lincoln.

A series of prenuptial courtesies has been held recently in Kansas City honoring Miss Bloom and her fiancé.

An autumn bride-elect who has been honored at bridal showers in recent weeks is Miss Eleanor Hitchcock, who has chosen Saturday, Nov. 16 as the date for her marriage to William L. Bardo.

Last Sunday, the soon-to-be bride was presented a miscellaneous shower by former neighbors and friends at Hildreth. The party was held in the parlors of the Hildreth Methodist Church, and members of the WSCS were hostesses.

Also in courtesy to Miss Hitchcock was the party for which Miss Dorcas Horner and Miss Harriet Hinchey were hostesses recently at the home of Miss Horner. The guests included former classmates of the bride-elect at Bryan Hospital School of Nursing.

The wedding of Miss Hitchcock, who is the daughter of Mr. and Mrs. Fred Hitchcock of Las Vegas, Nev., and Mr. Bardo will take place at a 7 o'clock evening service, to be solemnized at Christ Methodist Church.

Mr. Bardo is the son of Mrs. Clair Pettit.

Choosing a December wedding date is Miss Vicki Stutzman, daughter of Mr. and Mrs. Virgil H. Stutzman, who has announced that her marriage to Lonnie Kremer will be solemnized on Friday, Dec. 6.

For the 7 o'clock evening service at the Mennonite Church, Miss Stutzman has named Mrs. Ronald Lichty as her matron of honor, and her bridesmaid will be Miss Aldora Saltzman, both of Milford.

Ron Lichty will serve Mr. Kremer as best man, and seating the guests will be Mr. Kremer's cousin, Ken Kremer, also of Milford.

Monday evening, the bride-to-be will be the guest of

## Open House

Calvert PTA members will sponsor an open house at the school on Tuesday evening. All parents and their children are invited to attend the 7 o'clock to 8:30 o'clock event, visit the classrooms, and inspect the new addition to the school.

# FUN NEWS IN SUBURBIA

## COUNTRY CLUB TERRACE

Those chilly days are here again — a fact that puts an end to our theory that Nebraska had possibilities as a resort area. It also ends our dream that people would flock in the winter months to enjoy the tropical temperatures.

In a matter of a few days, our Ft. Lauderdale, Neb., changed into an autumn wonderland — accompanied by chilly temperatures and northerly breezes. But then again maybe we are fortunate—for what would we do with our Eskimo parkas or our snow shoes and ice skates? And what would we do without our recording of a "White Christmas?"

But suburban residents seem to adjust to any temperature and every activity imaginable.

A hostess at her Country Club Terrace home last Tuesday was Mrs. Marvin Price who entertained at a farewell coffee in honor of Mrs. Arthur Hickman.

Farewell bidders included Mrs. Hal Gillette, Mrs. Lyle Weishahn, Mrs. George Pearce, Mrs. Harold Kubick, Mrs. Harold Rice, Mrs. Ralph Bond, Mrs. Turley Cook, Mrs. Lyle Trease and Mrs. Gerald Smith.

Mr. and Mrs. Hickman and their children will be leaving Lincoln on Nov. 17, for their new home in Denver, Colo.

A birthday celebrant in Country Club Terrace last Saturday was Master Douglas Weishahn, son of Mr. and Mrs. Lyle Weishahn who celebrated his sixth anniversary.

## To Entertain

The mothers of Delta Upsilon fraternity pledges will be the guests of honor on Saturday when the Delta Upsilon Alliance will entertain at a 1 o'clock buffet luncheon at the chapter house.

New officers of the alliance are Mrs. Dorsey McIntyre, president; Mrs. Edward Hirsch, vice president; and Mrs. Walter R. Kepler, secretary-treasurer.

Douglas' guests for lunch and games were Ronnie Vilgert, Don Foltz, Kirk Fridrich, Ricky Rice, Kenny Gillette, Steve Bond, Bobbie Gulland, Shane Schrodt, Mark Colvorn, and the celebrant's sister, Donna.

Visitors in the neighborhood this week are Mr. and Mrs. Ralph Brestel who are the current houseguests of their son and daughter-in-law, Mr. and Mrs. Merle Brestel.

Mr. and Mrs. Brestel arrived last week from their

home in Chappell and will be visiting for several days before returning to their home.

## SUNNYSIDE ACRES

This seems to be moving month in Suburbia. The movers are going—either to a new area in the city or to another town. Sunnyside Acres residents who departed Lincoln last Friday for a new home in York, for instance were Mr. and Mrs. Roger Kamprath and their two children, Patti Sue and Matt.

## Candlelight Service

At a candlelight service solemnized Sunday evening, Nov. 10, Miss Janice Pauline Blome, daughter of Mr. and Mrs. Arlin Blome of Clanton, became the bride of Charles Everett Schmidt, son of Mr. and Mrs. Harlan Schmidt of Cortland. The lines of the ceremony were read by the Rev. Ronald Ehler at Zion Lutheran Church in Clanton, and the wedding music was played by Mrs. John R. Reichers of Wilber, organist. The vocalist was Mrs. Larry Larkins of Cortland.

Frocks of peau de soie in the daytime length were worn by the attendants who were Mrs. Orlynn Weishahn of Pickrell, as her sister's matron of honor; the maid of honor, Miss Glenda Schmidt of Cortland, sister of the bridegroom; and the bridesmaids, Miss Jane Schachenmeyer and Miss Sharon Walker, Crete. They carried white, feathered chrysanthemums.

Dallas Schmidt, Cortland, served his cousin as best man, and the ushers were Roger Blome, Clanton, brother of the bride; Ronald Schwaninger, Firth; Orlynn Weishahn, Pickrell; Bradley Hansel, Cortland; and Jim Krueger, Lincoln.

The bride chose white taffeta for her wedding gown. Petal appliques of Alencon lace and seed pearls accented the sculptured bodice, which was designed with a portrait neckline and long sleeves, and the applique motif was repeated on the very full skirt, which extended into a chapel train. Her illusion veil was held to the head by a rose of pearl-trimmed lace, and she carried a white Bible showered with stephanotis and pink roses.

The couple left for a wedding trip to the west coast, and later this fall will make their home in Cortland.

## Club Luncheon

The members of the Rotary Anns, wives of Rotary Club members, will meet for a 12:30 o'clock luncheon on Tuesday at the Hotel Cornhusker.

A business meeting and program will follow the luncheon.

# Bride On Sunday

Mr. Kamprath will be managing the new Safeway store in York.

Out-of-town guests at the home of Mr. and Mrs. Glen Martin and their children, Gary, Pam and Jacqueline are Mr. Martin's parents, Mr. and Mrs. Clarence Martin of Wolbach.

Mr. and Mrs. Martin arrived in Lincoln two weeks ago and will be leaving in the near future to spend the winter months in Oklahoma.

## CASINO HEIGHTS

Casino Heights residents who motored to Columbia, Mo., and the Nebraska-Missouri game last weekend were Mr. and Mrs. Robert Schulte.

Mr. and Mrs. Schulte spent the weekend with Mr. and Mrs. N. R. Garrett Jr. of Columbia, and then returned to their Casino Heights home on Sunday.

## FIENE HEIGHTS

Also celebrating a birthday recently was Miss Diane Sackett, daughter of Mr. and Mrs. George Sackett who was seven years old a week ago last Saturday.

In celebration of her birthday, Diane had as her guests for games, cake and ice cream, Sara Jane Boehmer, Ann Marie Cleaver, Susan Beth Damm, Megan Elizabeth Epp, Mary Sue Hinds, Carol Sue Hippe, Christine Juvan, Cheryl Keller, Barbara Seuss, Susan Weber, Robin Zimmerman, Terri Krivosha, Cindy Watkins, Debra and Denise Scheidt.

On Sunday, Diane was the guest of honor at a family celebration which included her grandmother, Mrs. Florence Pierce, and her uncle and aunt, Mr. and Mrs. Thomas McCarthy and their daughter Roxanne.

The marriage of Miss Velma Grace Schippert of Lincoln, daughter of Mr. and Mrs. Eugene Schippert of Republican City, to A.C. Ronald L. Wills, son of Mr. and Mrs. Lowell Wills of Twin Falls, Idaho, was solemnized Sunday afternoon, Nov. 10, at the First Methodist Church in Republican City. The Rev. Joe M. Baer read the lines of the 2 o'clock service.

Wearing bell-skirted frocks in Nassau pink taffeta trimmed with fabric roses were Mrs. Richard Brown, as the matron of honor, and the bridesmaids, Miss Dona Rockwell, Miss Carol Daum and Miss Jane Bott, all of Lincoln. Each carried a white fur muff ornamented with a single pink chrysanthemum.

Bob Wills of Twin Falls, Idaho, served as best man, and the corps of ushers included Bob McCormick, Richard Brown, Herb Roemer and Gary Friedman, all of Lincoln; and Richard Schippert of Republican City.

White silk taffeta touched with imported Alencon lace fashioned the bride's period gown. Floral appliques of the lace formed the sabrina neckline and patterned the front of the long-sleeved basque, and the lace continued in a wide panel down the front of the skirt, which was caught into side fullness and extended into a chapel train.

A cluster of taffeta petals held her veil of silk illusion, and she carried a crescent of pink roses.

Airman Wills and his bride will reside at 1900 F. The bridegroom is stationed at the Lincoln Air Force Base.

### COUNTRY CLUB TERRACE

Those chilly days are here again — a fact that puts an end to our theory that Nebraska had possibilities as a resort area. It also ends our dream that people would flock in the winter months to enjoy the tropical temperatures.

In a matter of a few days, our Ft. Lauderdale, Neb., changed into an autumn wonderland — accompanied by chilly temperatures and northerly breezes. But then again maybe we are fortunate—for what would we do with our Eskimo parkas or our snow shoes and ice skates? And what would we do without our recording of a "White Christmas?"

But suburban residents seem to adjust to any temperature and every activity imaginable.

A hostess at her Country Club Terrace home last Tuesday was Mrs. Marvin Price who entertained at a farewell coffee in honor of Mrs. Arthur Hickman.

Farewell bidders included Mrs. Hal Gilette, Mrs. Lyle Weishahn, Mrs. George Pearce, Mrs. Harold Kubick, Mrs. Harold Rice, Mrs. Ralph Bond, Mrs. Turley Cook, Mrs. Lyle Trease and Mrs. Gerald Smith.

Mr. and Mrs. Hickman and their children will be leaving Lincoln on Nov. 17, for their new home in Denver, Colo.

A birthday celebrant in Country Club Terrace last Saturday was Master Douglas Weishahn, son of Mr. and Mrs. Lyle Weishahn who celebrated his sixth anniversary.

Douglas' guests for lunch and games were Ronnie Viggert, Don Foltz, Kirk Fridrich, Ricky Rice, Kenny Gilette, Steve Bond, Bobbie Gulland, Shane Schrod, Mark Colvorn, and the celebrant's sister, Donna.

Visitors in the neighborhood this week are Mr. and Mrs. Ralph Brestel who are the current houseguests of their son and daughter-in-law, Mr. and Mrs. Merle Brestel.

Mr. and Mrs. Brestel arrived last week from their

home in Chappell and will be visiting for several days before returning to their home.

### SUNNYSIDE ACRES

This seems to be moving month in Suburbia. The movers are going—either to a new area in the city or to another town. Sunnyside Acres residents who departed Lincoln last Friday for a new home in York, for instance were Mr. and Mrs. Roger Kamprath and their two children, Patti Sue and Matt.

## Candlelight Service

At a candlelight service solemnized Sunday evening, Nov. 10, Miss Janice Pauline Blome, daughter of Mr. and Mrs. Arlin Blome of Clatonia, became the bride of Charles Everett Schmidt, son of Mr. and Mrs. Harlan Schmidt of Cortland. The lines of the ceremony were read by the Rev. Ronald Ehler at Zion Lutheran Church in Clatonia, and the wedding music was played by Mrs. John R. Reichers of Wilber, organist. The

coffice was Mrs. Larry Larkins of Cortland.

Frocks of beau de soie in the daytime length were worn by the attendants who were Mrs. Orlynn Weishahn of Pickrell, as her sister's patron of honor; the maid of honor, Miss Glenda Schmidt of Cortland, sister of the bridegroom; and the bridesmaids, Miss Jane Schachenmeyer and Miss Sharon Walker, Crete. They carried white, feathered chrysanthemums.

Dallas Schmidt, Cortland, served his cousin as best man, and the bushers were Roger Blome, Clatonia, brother of the bride; Ronald Schwaninger, Firth; Orlynn Weishahn, Pickrell; Bradley Hansel, Cortland; and Jim Krueger, Lincoln.

The bride chose white taffeta for her wedding gown. Petal appliques of Alencon lace and seed pearls accented the sculptured bodice, which was designed with a portrait neckline and long sleeves, and the applique motif was repeated on the very full skirt, which extended into a chapel train. Her illusion veil was held to the head by a rose of pearl-trimmed lace, and she carried a white Bible showered with stephanotis and pink roses.

The couple left for a wedding trip to the west coast, and later this fall will make their home in Cortland.

Floral appliques of the lace formed the sabrina neckline and patterned the front of the long-sleeved basque, and the lace continued in a wide panel down the front of the skirt, which was caught into side fullness and extended into a chapel train. A cluster of taffeta petals held her veil of silk illusion, and she carried a crescent of pink roses.

Airman Wills and his bride will reside at 1900 F. The bridegroom is stationed at the Lincoln Air Force Base.

## BRIDES

Plans for a late November wedding are being made by Miss Jan Bloom of Kansas City, Mo., daughter of Mr. and Mrs. C. E. Bloom of Lincoln, whose betrothal to Dale D. Harkins of Colby, Kan., was revealed earlier this fall.

The bride-elect, who will return to Lincoln on Nov. 15, has announced that the wedding will take place on Saturday, Nov. 30, and the ceremony will be solemnized in Lincoln.

A series of prenuptial courtships has been held recently in Kansas City honoring Miss Bloom and her fiancé.

An autumn bride-elect who has been honored at bridal showers in recent weeks is Miss Eleanor Hitchcock, who has chosen Saturday, Nov. 16 as the date for her marriage to William L. Bardo.

Last Sunday, the soon-to-be bride was presented a miscellaneous shower by former neighbors and friends at Hildreth. The party was held in the parlors of the Hildreth Methodist Church, and members of the WSCS were hostesses.

Also in courtesy to Miss Hitchcock was the party for which Miss Dorcas Horner and Miss Harriet Hincheley were hostesses recently at the home of Miss Horner. The guests included former classmates of the bride-elect at Bryan Hospital School of Nursing.

The wedding of Miss Hitchcock, who is the daughter of Mr. and Mrs. Fred Hitchcock of Las Vegas, Nev., and Mr. Bardo will take place at a 7 o'clock evening service, to be solemnized at Christ Methodist Church.

Mr. Bardo is the son of Mrs. Clair Pettit.

Choosing a December wedding date is Miss Vicki Stutzman, daughter of Mr. and Mrs. Virgil H. Stutzman, who has announced that her marriage to Lonnie Kremer will be solemnized on Friday, Dec. 6.

For the 7 o'clock evening service at the Mennonite Church, Miss Stutzman has named Mrs. Ronald Lichty as her matron of honor, and her bridesmaid will be Miss Aldora Saltzman, both of Milford.

Ron Lichty will serve Mr. Kremer as best man, and seating the guests will be Mr. Kremer's cousin, Ken Kremer, also of Milford.

Monday evening, the bride-to-be will be the guest of

Mr. McIntyre is a senior at the University of Nebraska where he is a member of Delta Upsilon fraternity.

honor at a party to be given by Mrs. Dean Oswald and Mrs. Don Wolfe at the home of Mrs. Oswald. During the informal evening, a miscellaneous shower will be presented the honoree.

Miss Stutzman was presented a personal shower recently when Mrs. Roger Stutzman entertained at her home. The 20 guests included feminine members of the family.

Mr. Kremer is the son of Mr. and Mrs. Lyle Kremer of Milford.

The members of Sigma Kappa sorority alumnae have been exceedingly busy during the past several weeks. Their annual Christmas bazaar is on the calendar for Saturday, Nov. 16, and the affair is to be held at the chapter house.

The proceeds from the bazaar will be used for the sorority's philanthropic project.

Miss Patsy Ann Jordan, daughter of Mr. and Mrs. Lee Jordan, became the bride of A.3C Glennis Markon, son of Mr. and Mrs. Marion Marken of Corning, Ohio, at an afternoon service on Sunday, Nov. 10. The ceremony was solemnized at the Salvation Army Citadel by Maj. Charles Duskin, and Miss Janice Bay, pianist, played the wedding music. Miss Bay also accompanied Mrs. Charles Duskin, the vocal soloist.

The maid of honor and bride's only attendant was Miss Cheryl Yager who wore a frock of chiffon over taffeta in the peacock blue

shade. Her brow veil of illusion was in matching tone. Arthur Peterson of the Lincoln Air Force Base served as best man, and the ushers were John Mitchell and Alan Jordan.

The bride appeared in a gown of white Alencon-type lace and chiffon over taffeta. The long-sleeved bodice of lace was designed with a sabrina neckline, highlighted with iridescent sequins, and the lace and chiffon skirt was completed by a back panel of ruffled tiers. A pearl crown held her bouffant veil of illusion, and she carried a white Bible clustered with white, feathered carnations.

The bidding:  
North East South West  
1 NT Pass 3 ♣ Pass  
4 ♣ Pass 6 ♣

Opening lead — eight of clubs.

This hand was played in New York in the world championship match between Italy and the United States in 1962.

When the American pair (Mathe and Von Der Porten) held the North-South cards, they quickly reached six clubs on the sequence shown. With the trumps being divided 2-2 there was no problem at all about the play of the hand and Von Der Porten easily made seven for a score of 1,390 points.

When the hand was then played on Bridgerama before a huge audience, with Belladonna and Avarelli now holding the North-South hands for Italy, there was a considerable concern in the partisan audience that the famed Italian pair, with their complicated but usually precise system, would reach the sound grand slam contract.

But, much to the amazement of the spectators, the bidding went:

North East South West  
1 NT Pass 4 ♣ Pass  
1 NT Pass Pass Pass

This astounding auction could not help but leave everyone mystified, though there was of course some basis for the strange bidding sequence.

In the Roman Club system played by Belladonna and Avarelli, the opening no-trump bid showed a balanced hand containing 17 to 20 points. The four club response in the heavily-gadged system showed precisely 14 points and had nothing to do with clubs, as such. The rebid of four notrump showed a minimum notrump with

Why Grow Old?

Hints For Dieters

Josephine Lowman

Here are a few more tricks which readers have found helped them to reduce successfully. They asked me to pass these along in the hope that they may aid other readers.

"Some years ago I lost 33 pounds in five and a half months, and have maintained my correct weight ever since. The reason I gained weight was because I associated with people who liked to eat."

Now this woman did not cut herself off from the human race as you might think from this statement. Listen to what she did! She wrote, "My trick was to refuse all invitations for lunch or dinner for a month. I didn't say why. By the time I could wear a size 11 they couldn't criticize me, and if they did, I didn't care. I am barely 5 feet tall and short waisted and size 11 is right for me."

This is an excellent idea if you have the stamina and determination to do it. You do not have to say why you refuse an invitation and no one asks you so often that anyone would think that you are acting strangely. After that first month, dieting is never so difficult like it often is at the beginning.

This reader also said that she found a hard-boiled egg

a very satisfactory in-between meal snack and that a bit of hard candy at times helped.

Another reader said, "First and foremost it seems to me that 90 per cent of a woman's time (one who has small children) is spent in the kitchen with the refrigerator door open. Right away this is trouble, unless you make some rules."

I agree. It is so easy and so human to take a bit of something yourself when you are feeding your children and that goes on all day long. One woman made a contract with herself never to eat when her children ate until she lost a certain number of pounds.

Some of these little tricks can make the difference between success and failure in reducing.

If you have any tricks you would like to share with other readers please send them along to Josephine Lowman in care of the Lincoln Star, Lincoln, Neb.

Dear Abby

People Do Answer Telephone With 'Hello'

Abigail Van Buren

DEAR ABBY: Our mother remarried two years ago. My brother, my sister and I are all in the teen-age group and we get quite a few telephone calls. Well, here is the problem. Our last name is Henderson, but our mother changed her name to Lupawitz when she married again. Our stepfather is a very nice man, but he wants us to answer the telephone. "Lupawitz's residence." When we do, the other person says, "Sorry, I've got the wrong number," and hangs up. Don't you think we should be able to answer the telephone, "Henderson's residence"?

MISSING CALLS

DEAR MISSING: Ask your stepfather if you can't just say "Hello" and not make a Federal case out of it.

\*\*\*

DEAR ABBY: Is there such a thing as a person being able to drive another person out of her mind? If there is, I think that is what is happening to me. I have an aunt who takes pleasure in saying things that hurt me. Like when I had my second child — it was another girl, she marched into my hospital room and said, "Oh, I wish you had had a boy for your husband. He looks soooooo disappointed."

On another occasion, when she saw my daughter all dressed up in her Sunday best, she remarked, "Such a pretty dress. Pity the child is so fat she doesn't look good in anything!" That woman has hurt me deeper than anyone I've ever known, and I've never done a thing to deserve it. My husband says, "Pay no attention to her — she's ignorant!" How can you get along with a person like that? She lives near me and visits often.

SICK AT HEART

DEAR SICK: If your aunt were only ignorant, you could forgive her. She's vicious. Why try to get along with

her? Try getting along without HER. You'll live longer.

DEAR ABBY: When I invite my relatives for dinner, they ask, "What's the celebration?" Or, "Who else is coming?" They seem to expect me to sell them on the idea of coming, or perhaps they want guaranteed entertainment. Why can't relatives be as gracious as friends in accepting invitations?

MOLLY

DEAR MOLLY: Some are. You can't pick your relatives, but you CAN pick your dinner guests.

"Rub-a-dub-dub, we wash our suits of double knit Acrilan®"

Our newest star attraction with a couturier look right down to the last buttonhole. And what a performance! Marcie Dale thoughtfully knitted these suits of double knit Acrilan® ... even after repeated washing, the pleats stay in and the wrinkles stay out ... and colors retain their sharp tones. Two from the collection:

A. White two-piece pullover is delicately trimmed with colorful imported French embroidery. Sizes 4 to 6x, \$15; 7 to 14, \$18.

B. Layered, three-piece suit features a white turtleneck pullover blouse with vest and pleated skirt in red or royal. Sizes 4 to 6x, \$20; 7 to 14, \$25.

GIRLS' SHOP—THIRD FLOOR

Miss Patsy Ann Jordan, daughter of Mr. and Mrs. Lee Jordan, became the bride of A.3C Glennis Marken, son of Mr. and Mrs. Marion Marken of Corning, Ohio, at an afternoon service on Sunday, Nov. 10. The ceremony was solemnized at the Salvation Army Citadel by Maj. Charles Duskin, and Miss Janice Bay, pianist, played the wedding music. Miss Bay also accompanied Mrs. Charles Duskin, the vocal soloist.

The maid of honor and bride's only attendant was Miss Cheryl Yager who wore a frock of chiffon over taffeta in the peacock blue

shade. Her brow veil of illusion was in matching tone. Arthur Peterson of the Lincoln Air Force Base served as best man, and the ushers were John Mitchell and Alan Jordan.

The bride appeared in a gown of white Alencon-type lace and chiffon over taffeta. The long-sleeved bodice of lace was designed with a sabrina neckline, highlighted with iridescent sequins, and the lace and chiffon skirt was completed by a back panel of ruffled tiers. A pearl crown held her bouffant veil of illusion, and she carried a white Bible clustered with white, feathered carnations.

The bidding:

North	East	South	West
1NT	Pass	3♣	Pass
4♣	Pass	6♣	Pass

Opening lead — eight of clubs.

This hand was played in New York in the world championship match between Italy and the United States in 1962.

When the American pair (Mathe and Von Der Porten) held the North-South cards, they quickly reached six clubs on the sequence shown. With the trumps being divided 2-2 there was no problem at all about the play of the hand and Von Der Porten easily made seven for a score of 1,390 points.

When the hand was then played on Bridgerama before a huge audience, with Belladonna and Avarelli now holding the North-South hands for Italy, there was considerable concern in the partisan audience that the famed Italian pair, with their complicated but usually precise system, would reach the sound grand slam contract.

But, much to the amazement of the spectators, the bidding went:

North	East	South	West
1NT	Pass	4♣	Pass
1NT	Pass	Pass	Pass

This astounding auction could not help but leave everyone mystified, though there was of course some basis for the strange bidding sequence.

In the Roman Club system played by Belladonna and Avarelli, the opening notrump bid showed a balanced hand containing 17 to 20 points. The four club response in the heavily-gadged system showed precisely 14 points and had nothing to do with clubs, as such. The rebid of four notrump showed a minimum notrump with

precisely 17 points.

Apparently Avarelli either did not give proper weight to his 3-1-4-5 distribution, or else the system was so clogged with artificial bids that there was no way for him to name his clubs and diamonds so that his partner would understand that he really had these suits.

Whatever the explanation, there is no doubt that something went drastically wrong with the machinery. Belladonna made seven notrump after taking a heart finesse, but, not having bid the slam, he scored only 720 points. Italy lost 670 points on the deal.

Why Grow Old?

Hints For Dieters

Josephine Lowman

Here are a few more tricks which readers have found helped them to reduce successfully. They asked me to pass these along in the hope that they may aid other readers.

"Some years ago I lost 33 pounds in five and a half months, and have maintained my correct weight ever since. The reason I gained weight was because I associated with people who liked to eat."

Now this woman did not cut herself off from the human race as you might think from this statement. Listen to what she did! She wrote, "My trick was to refuse all invitations for lunch or dinner for a month. I didn't say why. By the time I could wear a size 11 they couldn't criticize me, and if they did, I didn't care. I am barely 5 feet tall and short waisted and size 11 is right for me."

This is an excellent idea if you have the stamina and determination to do it. You do not have to say why you refuse an invitation and no one asks you so often that anyone would think that you are acting strangely. After that first month, dieting is never so difficult like it often is at the beginning.

This reader also said that she found a hard-boiled egg

People Do Answer Telephone With 'Hello'

DEAR ABBY: Our mother remarried two years ago. My brother, my sister and I are all in the teen-age group and we get quite a few telephone calls. Well, here is the problem. # British Expect Political Blaze

... PARLIAMENT TO RECONVENE

London (AP)—The British Parliament reconvenes Tuesday for the start of the Conservatives' battle to stay in power. Brilions expect the hottest political fight of the century.

The new prime minister, Sir Alec Douglas-Home, will take his freshly won seat in the House of Commons to face the assault of opposition leader Harold Wilson and his Labor Party, which pollsters predict stands a good chance of taking control for the first time since 1951. Douglas-Home must call new national elections within a year's time.

It's a near-Herculean task Sir Alec is taking on. He's got to reverse a voting tide that has been running against the Conservatives persistently in special elections for the last two years.

**Sorely Buffeted**

He must reinvigorate a government and party that has been sorely buffeted by sex-and-security scandals the past year, that has been accused of letting Britain lag at home and abroad and failing to grasp the problems—and opportunities—of the new age of automation and scientific marvels.

But the willowy, 60-year old ex-nobleman, who gave up an ancient peerage for the rough and tumble of political battle, has already given signs that he doesn't intend to be a hapless Daniel thrown into a den of Laborite lions.

He's fresh from a personal triumph scored in Scotland's Kinross and West Perthshire District, where he swamped Labor and Liberal opponents to win the seat that brought him back to the Commons for the first time since 1951, when he left it and went into the House of Lords with his inherited title of 14th Earl of Home.

**Turning Of The Tide?**

Sir Alec publicly interpreted his victory as a turning of the tide for the Conservatives and a vote of confidence in himself and his government.

But on the same day Labor won a significant victory. It captured the Commons seat at Luton, a booming automotive center near London, by trouncing the Conservative candidate in a special election.

At Luton the Conservatives were rejected by an electorate which has probably "never had it so good."

Statisticians figured that if Labor can carry the country in the next national election like it did Luton it would take over the government with a majority of more than 200 in a new House of Commons.

Wilson has pledged the country a program to "bring Britain into the 20th Century"—with expanded scientific education, worker retraining to face the challenges of automation, vigorous production and trade policies and increased social services.

It will be Sir Alec's task to counter this challenge by getting a similar Conservative program going before he has to call a new election.

**Good Start**

To do it, he will not only have to battle Labor in Parliament but rebuild his own party's morale. He has already made a good start with his own election victory and is said to have made a good impression by the brisk and business-like way he handles cabinet meetings, in contrast to the discontent and inertia that marked the last months of the harassed Macmillan administration.

Sir Alec also has proved himself a pleasing personality on television. He is expected to use TV and the news conference to make a stronger pitch for public approval than any other British prime minister in history. But he'll need time and lots of hard work to continue that "new chapter" he said began with his election triumph at Kinross and West Perthshire.

And he has confidently said "just wait and see" to Britons who expect he might be eaten alive by the Laborites in Commons debate.

**No Cricket Match**

Harold Wilson says the battle "won't be a cricket match at Lords" but a serious debate on the country's future.

"And after Luton," Wilson added, "I don't think there is very much doubt how the country will decide."

## Texans Keep Poll Tax; Demos Predict Chaos

Dallas (UPI)—The decision by Texans to continue paying a \$1.75 tax to vote brought a warning from Democrats and a cheer from Republicans Sunday.

The Democrats said next year's state elections may be chaotic and the Republicans felt they have a better chance of bringing the state under their control in 1961.

**Texans Saturday** turned down a proposed amendment to the state constitution which would have done away with the 61-year-old poll tax.

**301,455 For**

The latest returns from the Texas election bureau showed 301,455 votes against and 235,849 for the repeal.

Soon after the results became apparent, Sen. Ralph Yarborough, D-Tex., said the state was "going to face a very complicated set of elections next year."

Yarborough said he was sure an amendment to the U.S. Constitution abolishing the poll tax as a requirement for voting would be adopted.

If this happens, Texas voters would have to pay a poll tax for state elections, but not for national elections.

"I'm not surprised at today's result," Yarborough said, "although I was very strongly for repeal."

**GOP Opposed Repeal**

Republicans in the state were generally opposed to the repeal, charging it was designed to help President Kennedy carry Texas again in the 1964 election.

**ADVERTISING**

**More Comfort Wearing FALSE TEETH**

Here is a pleasant way to overcome loose plate discomfort. FASTEETH, an improved powder, sprinkled on upper and lower plates holds them firmly so that they feel more comfortable. No gummy, soapy, pasty taste or feeling. It's alkaline (non-acid). Does not sour, checks "plate odor breath". Get FASTEETH today at drug counters everywhere.

Republican State Rep. Horace Houston, who helped lead the fight against repeal, said he thought its defeat was a trend that would carry into the presidential election.

"It looks like the Republicans are solidifying their vote in Texas," Houston said.

The poll tax decision was not the only thing Republicans were happy about.

**Pickle Ahead**

Jim Dobbs, a GOP member, worked his way into a run-off for the 10th Congressional District seat in the U.S. House of Representatives. Dobbs trailed Democrat J. J. (Jake) Pickle in the balloting, but polled more votes than liberal Democrat Jack Ritter.

At latest count, Pickle had 14,329 votes, Dobbs 13,639, and Ritter 12,917.

The special congressional election was held to fill the vacancy left by Rep. Homer Thornberry, D-Tex., who resigned to take a federal judgeship.

**Priest Peddles Papers—So He Won't Get Lazy**

London (AP)—A 38-year-old Church of England rector admitted Sunday that he works as a newsboy on weekday mornings.

He goes off on his newspaper route at 5:30 a.m. six days a week, "to set an example to country clergymen who are tempted to stay in bed too late in the mornings."

Said the Rev. Anthony Andrews, rector of Evershot, Dorset:

"For a country parson, there is a temptation to lie abed in the mornings. I felt I needed some self-discipline. The money's handy, too."

He gets three pounds (\$3.40) a week.

## Engineers In Bolivia

La Paz, Bolivia (AP)—A group of Japanese engineers arrived last week to make a 45-day study of dams and hydraulic projects in Bolivia.

## Jingle Bells Ring Early This Year

New York (AP)—Jingle Bells will ring early this year. Thanksgiving Day, which usually signals the start of the Christmas season, falls this year on Nov. 28, the latest it has been since 1957.

This has cut down the holiday shopping period. Instead of the 27 shopping days from the day after Thanksgiving until the day before Christmas, as there were last year, there would be only 22 shopping days this year.

As a result, the nation's stores, which account for about 16% of their entire year's business during the Yuletide season, plan to set up Christmas decorations and toy displays at least a week earlier this year.

**Efficiency**

"Actually," said Edward Engle, manager of the sales promotion division of the National Retail Merchants' Association, "retailers believe they will be advancing the Christmas season primarily for the sake of more efficiency — for the customers as well as for themselves."

The association, which has its headquarters here, represents more than 10,000 member stores in the nation.

Christmas decorations will start going up in stores this week and next week. Holiday catalogs are already beginning to be circulated. Toy departments should be in full business swing almost any day now.

**'Mail Now'**

Post Office officials in Houston, Tex., and Indianapolis have begun circulating letters advising the public to "shop now — and mail now."

Last year, when there were five Thursdays in November, and Thanksgiving fell on the fourth Thursday of the month, the holiday came on Nov. 22. This year, November has only four Thursdays, thus accounting for the lateness of Thanksgiving Day.

# Creighton Prep Has Fourth State Crown In Six Years

... THREE LINCOLN CLUBS IN TOP 10

By DON FORSYTHE  
Prep Sports Writer

Creighton Prep, which won or shared state football titles in 1958, 1959 and 1960, returns to the top again this season following an unbeaten season which boosted the Junior Jays' winning streak to 16 games.

Don Leahy's top-rated team successfully withstood the challenge of unbeaten Lincoln Northeast, which was ready to step up to the No. 1 spot

had the Junior Jays faltered against third-rated Tech in the Intercity title match.

The Rockets, who have the best three-year record in Class A ranks, headed the three Lincoln Schools earning top ten spots.

SE Fifth

Southeast grabbed the No. 5 spot in the final ratings, the highest football finish ever recorded by the Knights.

Lincoln High facing the state's toughest schedule,

closed at No. 8 with a strong finish.

Only changes on this week's chart came when Bishop Ryan swapped places with Southeast and Scottsbluff moved ahead of Grand Island.

Ryan Advances

Ryan benefits from Scottsbluff's win over Grand Island and from its closing rout of Pius X.

Scottsbluff, the Big Ten champion, finished with a 7-2-1 record to make its first appearance in the top ten since 1959.

East Big Ten teams Fremont and Columbus were the major challengers for top ten spots.

## Nebraska Prep Ratings

Overall class rankings of high school football teams, based on season's performances.

By Don Forsythe

### Class A

- 1-Creighton Prep (9-0)
- 2-Lincoln Northeast (9-0)
- 3-Omaha Tech (7-2)
- 4-Bishop Ryan (5-3)
- 5-Lincoln Southeast (6-3)
- 6-Bellevue (5-4)
- 7-Omaha Westside (5-3-1)
- 8-Lincoln High (4-5)
- 9-Scottsbluff (7-2-1)
- 10-Grand Island (5-5)

Challengers-Fremont (4-5) and Columbus (7-2).

Comment-Overall quality of play in Class A poorer this year than in recent campaigns.

## —COLT DEFENSE HANGS ON— Lions' Rally Short; Baltimore Triumphs

Baltimore (P) — The Baltimore Colts scored 17 quick points and the defense had to hang on for a 24-21 National Football League victory over the Detroit Lions Sunday.

The Lions whittled away the Colt lead to three points before the third quarter ended and were across midfield three times in the scoreless last quarter. They were set back twice on 15 yard penalties for clipping and an off-side killed their last chance.

The Colts, after hitting long and fast on the throwing of

quarterback John Unitas, had a 24-7 lead early in the second quarter and that was all for them.

Defensive heroics by half-back Bruce Maher, who blocked a field goal try, intercepted a pass and stole the ball, gave the Lions their big opportunities to fight back.

The Colt offense looked as in their days of yore in the first quarter. On the third play, Unitas and Raymond Berry connected for a 64-yard scoring play. It was the first touchdown of the season for Berry and longest for the Colts, who had scored through the air only seven times in eight games.

After Jim Martin kicked a 25-yard field goal, John Mackey took a 42-yard scoring pass from Unitas and the Colts led 17-0.

Quarterback Earl Morrall ran and passed the Lions to a touchdown early in the second quarter, a 20-yard to Gail Cogdill doing the trick.

The Colts went 67 yards in eight plays to preserve their 17-point margin, Lenny Moore running the last four for the score.

Maher blocked a field goal try by Martin and in five plays the Lions went 44 yards for a touchdown by Tom Watkins. After Maher intercepted a Unitas pass, Detroit moved 76 yards in seven plays for the last score of the game on a 10-yard pass from Morrall to Terry Barr.

## ★ ★ ★ Vaughn Knots Loop Point Race

Tom Vaughn of Iowa State has pulled into a first place tie with teammate Dick Limerick for the Big Eight scoring lead.

Vaughn tallied two touchdowns against Oklahoma Saturday while Limerick added the extra point in each case to give the two Iowa State stars 54 point each.

Gale Sayers of Kansas moved into third with his TD gallop against Nebraska giving the Jayhawk halfback 50 points for the season.

# Safety Gives Steelers 9-7 Upset Of Browns

BIG HOLE . . . and Eagles' Clarence Peaks picks up three.

## 42-14 Win Over Eagles Ties NY For First Place

New York (P) — The New York Giants charged into a first-place tie in the Eastern Division of the National Football League Sunday by rolling over the battered Philadelphia Eagles 42-14.

Y. A. Tittle, the old Bald Eagle of the Giants, threw three touchdown passes and completed 16 of 20 for 261 yards.

Phil King scored twice for the Giants, on a 38-yard pass play from Tittle and a three-yard romp around end. Tittle hit Joe Morrison on a seven-yard touchdown pass and Frank Gifford on a 14-yard toss. Alex Webster drove home from the two after a 40-yard pass from Y. A. to Aaron Thomas. Don Chandler added the five extra points.

The Eagles were in the ball game only briefly. A 64-yard bomb from King Hill to the fleet Tommy McDonald tied the score at 7-7 in the first period. After that, the Giants simply battered the Eagles forward wall and hounded Hill and his successor, former Giant, Ralph Guglielmi, who made his first appearance for Philadelphia.

After Tittle had posted a 35-7 lead on the scoreboard, coach Allie Sherman gave rookie Glynn Griffing a chance to run the club with three minutes to go in the third period. The former Mississippi quarterback finished the game although he gave up a touchdown when rookie Lee Roy Caffey of Texas A&M intercepted and ran 67 yards for an Eagle score.

In the final two minutes Griffing threw his first TD pass as a pro, a 22-yard toss to Del Shofner, who was all alone in the end zone. Chandler added his sixth conversion.

Griffing threw his first TD pass as a pro, a 22-yard toss to Del Shofner, who was all alone in the end zone. Chandler added his sixth conversion.

## San Diego 'Phantom' Slips Past Patriots, 7-6

Boston (P) — San Diego flanker back Lance Alworth and linebacker Chuck Allen combined with George Blair's decisive conversion kick to give the Chargers a bruising 7-6 American Football League victory over Boston's Patriots Sunday.

Alworth, who moved like a phantom through the Patriots' touted defensive secondary, scored the game's only touchdown on a 27-yard pass play from Tobin Rote in the first period.

Allen led a suddenly angry Charger defense which repeatedly turned back Boston threats in the second half except for 35 and 25-yard field goals by Gino Cappelletti.

Allen's second pass interception and a fumble recovery twice thwarted the Patriots in the final quarter. Boston

got a break when Bob Dee recovered a fumble at the Chargers' 42 but Allen personally hurled back the losers' running game and Cappelletti was far short with a field goal from his own 48.

Alworth, a fantastic fugitive from Arkansas, completed a great 50-yard pass play to the Patriots' 12 one play before the finish which sealed the verdict.

Alworth's 13 receptions for 210 yards left a Fenway Park crowd — and the Patriots' defense — breathless.

## —SOONER-TIGER CLASH TOPS WEEK'S SLATE— Big 8 Showdown Near

ers whipped Kansas, 23-9, Saturday. The Scarlet and Cream gridders must now get by Oklahoma State, which has yet to win a conference game in four tries.

The Cowboys have only one win all season, that coming Saturday, 33-24, over Tulsa in a game that Oklahoma State threatened to blow after taking a 33-0 lead.

But while Nebraska will be a heavy favorite in its only remaining pre-Oklahoma test, the Sooners face a much tougher chore when they meet Missouri at Columbia this week.

The Tigers bounced back from a 13-12 setback to the Huskers with a 28-7 romp over Colorado Saturday and Missouri knows full well it must win this Saturday against Oklahoma to keep a slim glimmer of hope alive for a Big Eight tie.

Only Nebraska, Oklahoma and Missouri have a shot remaining at the Big Eight crown since Kansas and Iowa State were both mathematically eliminated by their Saturday losses to Nebraska and Oklahoma respectively.

A Missouri loss to Oklahoma would eliminate the Tigers from contention and leave it all up to the Sooners and Huskers when they meet before a sellout throng at NU Memorial Stadium.

That is unless Phil Cutchin's Cowboys down at Oklahoma State begin feeling their toughness and whack an unsuspecting foe—notably either Nebraska or Oklahoma or both. The Cowboys meet Oklahoma the Saturday following the OU-NU clash.

Kansas and Iowa State are still battling for the fourth spot in the Big Eight race and the Cyclones can cinch at least a tie for the final

## ★ ★ ★ Claridge, Johnson May Miss Game

Two Nebraska backfield stars may miss Saturday's game with Oklahoma State. NU trainer Paul Schneider said Sunday fullback Rudy Johnson had suffered a strained foot in the win over Kansas. Schneider explained that it is a type of injury that generally responds slowly and he listed Johnson as very doubtful for the Oklahoma State game.

The Husker trainer also noted that quarterback Dennis Claridge may miss the contest with the Cowboys. "He is improving, but we don't know if it will improve enough to allow him to play," Schneider said.

first division spot this week. Iowa State closes out its Big Eight campaign, entertaining last place Kansas State at Ames, and a Cyclone win would give coach Clay Stapleton's squad a 4-3 loop mark.

Kansas would then have to get by Colorado Saturday and Missouri the following week to match the Cyclones' effort.

But few Big Eight followers, especially in Nebraska and Oklahoma, have any interest in what goes on outside of Columbia, Mo., and Stillwater, Okla., this week, sites where the Sooners and Huskers will be the visitors.

## Fourth-Quarter Surge Decides

... ED BROWN TOSSES WINNER

Pittsburgh (P)—Ed Brown's nine-yard touchdown toss to Gary Ballman and a safety enabled the Pittsburgh Steelers to squeeze out a 9-7 victory over the Cleveland Browns in a bruising National Football League game.

Cleveland's loss, coupled with New York's 42-14 conquest of the Philadelphia Eagles, knocked the Browns out of undisputed possession of first place in the Eastern Division. The Browns now share the top spot with New York, each with 7-2 records.

A record crowd of 54,497 at Pitt Stadium saw the Steelers, trailing 7-2, recover a fumble and storm 82 yards in the final period to pull out the victory.

### Key Play

The key play in the Steelers' touchdown drive was a 41-yard pass from Brown to Buddy Dial after Ernie Greene fumbled and Brady Keys grabbed it on the Steelers' 18.

Linebacker Bob Schmitz caught Jimmy Brown of Cleveland in the end zone for a safety in the third quarter. Cleveland jumped off to a 7-0 lead in the second quarter on a four-yard touchdown pass from Frank Ryan to Gary Collins.

### Brown Stopped

The Steelers' defense bottled up Jimmy Brown in the second half and with it went the Cleveland offense. Brown gained only eight yards in the second half after chewing

up 92 yards rushing in the first half.

The Browns, with Brown and Green alternating, drove 74 yards for their only score. Brown's total for the day in rushing was 100 yards.

Lou Michaels, the Steelers' usually reliable place kicker, missed five field goal attempts from the 49, 45, 25, 29 and 45.

John Henry Johnson, returning to his 1962 running form after an ankle injury kept him out of a half-dozen games, including Cleveland's 35-23 victory over the Steelers earlier in the season, picked up 131 yards in 27 carries.

Statistics

## —VIKINGS HIT, 28-7— Sub Roach's Arm Awakens Packers

Green Bay, Wis. (P) — Quarterback John Roach rallied a sluggish Green Bay offense and passed for three touchdowns as the Packers defeated the upstart Minnesota Vikings, 28-7, Sunday in a League duel.

Roach, making the most of his starting status while Bart Starr recuperates from a broken hand, fired scoring strikes to Marv Fleming, Boyd Dowler and Tom Moore as the Packers posted their eighth straight victory.

The Vikings, who have a 3-6 record, humbled the defending NFL champions much of the way before Roach pulled together his charges in the second half.

Minnesota scored on an 18-yard pass from Fran Tarkenton to Paul Flatley in the first period and checked the Packers until Hank Gremminger picked off a pass and returned to the Viking 39 in the second quarter.

On the ninth play Roach passed to Fleming, subbing for the injured Ron Kramer, for a 12-yard scoring play.

With their ground attack shackled by the fired up Minnesota defense, the Packers took to the air at the outset

of the second half and moved 83 yards in six plays to go in front to stay. Roach passed to Dowler for 49 yards in the big gainer and then hit his lanky flankerback for 20 yards to cap the drive.

Roach passed to Moore on a 45-yard maneuver for another touchdown in the 11th minute of the final quarter before retiring.

Zeke Bratkowski, obtained on waivers from Los Angeles two weeks ago, then made his Green Bay debut at quarterback. The Vikings surrendered the ball at their 21 when Tarkenton was dropped trying to pass on fourth down. And five plays later Bratkowski passed 10 yards to Moore in the end zone.

## BOXER FATALLY STABBED BY STEPDAUGHTER

New York (UPI) — An 18-year-old girl was held without bail Sunday in the fatal stabbing of her stepfather, a hulking boxer who fought professionally as Young Jack Johnson and once knocked out former heavyweight champion Ezzard Charles.

Johnson, 35, born John Lee Storey, died late Saturday of a wound in the chest inflicted, according to police, by his stepdaughter, Bobbie Steptoe in a family argument.

Two officers reportedly saw the stabbing. Called to Johnson's Queens home in a report of a dispute, they found Johnson and Bobbie in

# LeClerc's Boots Allow Bears To Eke Out Win

... RAMS SUFFER 6-0 LOSS

Chicago (AP) — Roger LeClerc booted field goals in the first and third quarters and the Chicago Bears' defense did the rest, protecting a 6-0 victory over the Los Angeles Rams Sunday.

As the Bears' offense sputtered behind erratic quarterback Bill Wade, such defensive giants as Earl Leggett, Bob Kilcullen, Doug Atkins and 260-pound rookie John Johnson of Indiana came to the rescue.

They hounded Roman Gabriel so viciously that the Rams' passer seldom was on balance. The Rams never got past the Bear 36 and in the first half they gained only 36 yards, including a minus three in the air.

The Bears drove 65 yards to the Ram nine in the opening five minutes of the game. But a series of penalties set them back and eventually LeClerc booted a 30-yard field goal.

The Bears nursed the 3-0 lead until 3:20 remained in the third period. Wade's 15-yard pass to Mike Ditka and Willie Gallimore's 44-yard sprint with a flat pass to set up another field goal attempt. LeClerc hit the 16.

Los Angeles 0 0 0 0 0

## Knights Get 11th Straight Victory

Omaha (AP) — Unbeaten Omaha did all its scoring in the third period en route to a 4-1 victory over Cincinnati in the Central Professional Hockey League Sunday night.

A crowd of 2,511 saw the Knights pick up their 11th victory.

Howie Menard put Cincinnati in the lead in the first period with a goal at 11:38.

After a scoreless second period, Bob Courty tied it up 32 seconds into the final stanza, the first of his two goals.

Germain Gagnon and Jim Roberts also counted for the Omaha team.

## COMIN' THROUGH

NU's Joe Luk moves through two Creighton players in a soccer contest won by Nebraska Sunday, 3-2. Luk scored the first goal for Nebraska, Ali Shafiee got the other two for the winners. # Johnson Paces 24-20 Card Victory Over Washington

St. Louis (AP) — Sophomore sensation Charley Johnson broke a St. Louis club record with three touchdown passes that gave the Cardinals a 24-20 victory over the Washington Redskins Sunday in a National Football League contest.

Two late touchdowns by Washington on short runs by Billy Barnes made the score close.

Johnson pitched to Bob Paremore for 30 yards, Bobby Joe Conrad for 20 and Sonny Randle for 14 on his scoring heaves. He has thrown for 18 touchdowns this season, breaking the old team mark of 17 set by Paul Christman in 1947 and tied by Jim Hardy in 1950 and John Roach in 1960.

But Johnson had to share some of the glory with the

Cardinal defense that held the Redskins without a touchdown until the last period. Before that, only two field goals by Bob Khyat kept Washington in the game.

St. Louis scored the only touchdowns of the opening half the first time it had the ball. Johnson led the 84-yard drive with runs of 13 and 11 yards, a pass to Randle for 19 yards and the payoff heave to Paremore, who went in untouched.

Johnson's 23-yarder to Conrad set up his third period scoring toss to the sure-handed flanker, who leads the league with 51 catches after adding four against Washington.

Redskin flanker Bobby Mitchell, who could catch only four for 68 yards against the defending of Pat Fischer, let a punt roll through his legs in the fourth quarter and the Cardinals recovered on the Redskins 30. Johnson hit Randle moments later for the score that proved decisive.

# Rookie Frank Beard Cops Sinatra Crown

Palm Springs, Calif. (AP) — Frank Beard, a virtually unknown first-year pro from Louisville, Ky., shot a two-under-par 69 Sunday and won the \$50,000 Frank Sinatra Invitational Golf Tournament. He beat Jerry Steelsmith by a stroke.

Beard's 72-hole score of 68-72-69-69-278 was six under par. And his winner's purse of \$9,000 was \$61,62 more than he had won in all his previous tournaments.

Beard, 24, won it with birdie putts of six or seven feet on the 16th and 17th holes.

"Somehow," he said, "the pressure was worse on the last hole, after I got that two-stroke lead, than it had been on the 16th and 17th."

Beard birdied two holes on his first nine, but bogied both the ninth and 10th. "That upset me so much," he said, "that I almost bogied the 11th too. But I got out of that one."

Beard joined the PGA tour last November and had won \$8,938.38 coming into the Sinatra even. His highest finishes were a tie for fourth place in the Oklahoma City Open and a tie for fifth in the Waco Turner Open at Burneyville, Okla.

He is a younger brother of Ralph Beard, a star basketball player at the University of Kentucky in the late 1940s.

# Grid Protests Irk Chicago U Prexy

Chicago (AP) — Sit-down pickets with a compulsion to protest football games at the University of Chicago have been invited by president George Wells Beadle to quit the school.

Events at Stagg Field Friday had uniformed football players sitting in the grandstands watching non-players jolling or milling on the 50-yard line.

Beadle, not amused by the sit-down demonstration which delayed the Chicago Physical Education Class game with North Central College of Naperville, told student protestors they could underline any "serious compulsion" to protest by quitting the school.

There was no immediate undergraduate reactions at the university Sunday as a result of Beadle's statement Saturday.

Friday's game, which was restricted to about one half hour because of the delay caused by the demonstration on the field of more than 50 students, ended after darkness with the Chicago Physical Education Class squad at the short end of a 7-6 score. It was the season's second match with North Central.

It was the final effort for the Chicagoans in a four-game schedule. They lost their first two games this season—to junior college squads from North Central and Lake Forest—but won the third from University of Illinois' Chicago Branch, 21-0.

Police hauled five demonstration leaders from the field Friday. Many of the other demonstrators took to the stands and apparently enjoyed the game after their sit-down in midfield was broken up.

# Kelso Is Heavy Favorite For International Laurels

Laurel, Md. (AP) — Trainer Carl Hanford watched Kelso in his final tune-up for Monday's Washington, D.C., International and pronounced the great American champion

ready to take on nine other horses from seven nations.

"He's coming up to the race well," Hanford said after the 6-year-old gelding was timed at 36.5 seconds for three-eighths of a mile on the Laurel Race Course turf Sunday morning.

Prestige is the prize as Kelso tries for the third time to win the mile and one-half grass race and add world honors to his American horse-of-the-year award—which he has already clinched for three-eighths of a mile on the Laurel Race Course turf Sunday morning.

Kelso finished second in his two previous International starts. He pushed America's T.V. Lark to a course record in 1961, and lost in the stretch last year to Match II of France. That was the third victory for France and gave the foreigners a 6-5 edge.

Kelso has been established the even-money favorite.

Jessen Recovers To Tie Tourney

San Antonio (AP) — Ruth Jessen recovered from early troubles a bit faster than Kathy Whitworth thus climbed back into a tie for the lead in the \$8,500 San Antonio Civitan Open Golf Tournament Sunday.

Ruth Jessen	71-72-73-216
Kathy Whitworth	72-73-74-219
Judy Tomlin	73-74-75-220
Nancy Wright	74-75-76-225
Dee Raulk	75-76-77-228
Stacy Lena Faulk	76-77-78-231
Margaret Hager	77-78-79-234
Clifford Ann Creed	78-79-80-237

Don Meredith also connected on three scoring drives and gained 282 yards in the first half to give the Cowboys a 21-10 lead before the 49ers staged a second-half uprising to capture only their second triumph of the campaign.

Meredith struck quickly, throwing two touchdown passes to Fred Clarke on plays covering 15 and 24 yards and a third for 15 to Bill Howton, all in the first half.

The 49ers, meanwhile, had only seven points and the crowd boomed near intermission when coach Jack Christiansen ordered the field goal try that proved successful.

The crowd wanted San Francisco to gamble on the fourth-down play.

Although they didn't do it in the first half, the 49ers gambled twice in the second, both times gaining the needed yardage on fourth-down plays that kept a pair of touchdown drives going amidst the cheers of the relatively small crowd of 29,563 in Kezar Stadium.

San Francisco's defensive corps played a major role,

# Tobin Peps Oilers To 31-27 Victory

... PASS THEFTS' HELP

Houston (AP) — Bill Tobin ran for three touchdowns and George Blanda furnished the difference with a field goal Sunday as the Houston Oilers won a frantic 31-27 comeback victory over the New York Jets in an American Football League game.

Five pass interceptions and a frantic 14-point fourth quarter by the Oilers, and 13 points by the Jets left the game in

doubt until the closing seconds.

Rookie Bill Baird flashed 93 yards on a punt return with 3:40 left in the game to give the Jets a brief 21-17 lead.

A passing battle developed between Dick Wood, of the Jets and Blanda. The former completed 20 of 40 passes for 312 yards. Blanda, a 14-year veteran, hit 19 of 32 for 205 yards, including one touchdown throw to Charley Hennigan.

Bobby Jancik, Gene Babb and Freddy Glick intercepted key passes by Wood to foil Jet touchdown drives. Jancik intercepted two passes, Babb, Glick and Doug Cline one each.

The Jets were unable to snatch any Blanda passes.

# AAU Stops NCAA Bid

Washington (AP) — The amateur Athletic Union whipped the colleges Sunday in a showdown vote that saw the U.S. Olympic Committee reverse its board of directors in a dispute over international baseball.

The show of muscles by the AAU in the first roll call vote of the two-day meeting indicated likely approval Monday of a new voting plan that will give the AAU an even bigger margin over the National Collegiate Athletic Association in the Olympic Committee.

The feud between the AAU and the NCAA threatened to wreck America

# LeClerc's Boots Allow Bears To Eke Out Win

... RAMS SUFFER 6-0 LOSS

Chicago (AP) — Roger LeClerc booted field goals in the first and third quarters and the Chicago Bears' defense did the rest, protecting a 6-0 victory over the Los Angeles Rams Sunday.

As the Bears' offense sput-

tered behind erratic quarterback Bill Wade, such defensive giants as Earl Leggett, Bob Kilcullen, Doug Atkins and 260-pound rookie John Johnson of Indiana came to the rescue.

They hounded Roman Gab-

riel so viciously that the Rams' passer seldom was on balance. The Rams never got past the Bear 36 and in the first half they gained only 36 yards, including a minus three in the air.

The Bears drove 65 yards to the Ram nine in the opening five minutes of the game. But a series of penalties set them back and eventually LeClerc booted a 30-yard field goal.

The Bears nursed the 3-0 lead until 3:20 remained in the third period. Wade's 15-yard pass to Mike Ditka and Willie Galimore's 44-yard sprint with a flat pass to set up another field goal attempt. LeClerc hit from the 16.

Los Angeles 0 0 0 0-0  
Chicago 3 0 0 3-6

## Knights Get 11th Straight Victory

Omaha (AP) — Unbeaten Omaha did all its scoring in the third period en route to a 4-1 victory over Cincinnati in the Central Professional Hockey League Sunday night.

A crowd of 2,511 saw the Knights pick up their 11th victory.

Howie Menard put Cincinnati in the lead in the first period with a goal at 11:38. After a scoreless second period, Bob Courcy tied it up 32 seconds into the final stanza, the first of his two goals.

Germain Gagnon and Jim Roberts also counted for the Omaha team.

## ... STOCK EXCHANGE HEAD TELLS STAND

Bonn (UPI) — Keith Funston, president of the New York Stock Exchange, said Sunday night he believes it is all right for the United States to sell wheat or other consumer goods to the Soviet Union, "for cash on the barrelhead or normal short term credit."

Funston arrived here with 19 other leading U.S. businessmen who met Soviet Premier Nikita S. Khrushchev in Moscow last week.

Funston said Soviet leaders seem mainly interested not in consumer products but in producers' goods such as fer-

tilizer plants and chemical factories, which they wish to buy on credit up to 25 years.

"No Sense At All"

"That would amount to an American investment in the Soviet Union," Funston said, adding "it makes no sense at all."

"Best of all would be for us to sell consumer goods for cash to (eastern European) satellite nations," he said.

Funston was questioned by newsmen as he and the other American executives left a private dinner at the residence of U.S. Ambassador George McGhee. West Ger-

man Chancellor Ludwig Erhard was the guest of honor.

The Stock Exchange president had been quoted in a news dispatch from Berlin Saturday as saying he was opposed to the sale of U.S. wheat or any other goods to the Russians. He indicated his opinion had been misunderstood.

He favored the sale of consumer goods to the Soviet for cash, he said, because it draws away funds the Soviet Union otherwise could use to strengthen its military machine.

KEITH FUNSTON

## Alliance For Progress May Get 'Latin Look'

Sao Paulo, Brazil (AP)—Hemisphere leaders meet Monday to decide if the Alliance for Progress can better live up to its name with more of a Latin look.

Such a change already has been agreed upon by technical experts from the United States and Latin America.

Now the question goes before a meeting of top-level representatives of the 20-nation alliance. Undersecretary of State W. Averell Harriman is representing the United States at the Inter-American Economic and Social Council conference.

A total of 46 resolutions dealing with economic integration, foreign trade and new machinery for the alliance

has been prepared in 10 days of preliminary work by technical experts.

The new machinery for the alliance—a multibillion dollar program offered by President Kennedy as a cure of some of Latin America's economic ailments and an antidote for Communism—is intended to erase some of its Yankee overtones and make it look more like an idea cooked up by the Latins themselves.

Acting on the recommendations of two former presidents, Juscelino Kubitschek of Brazil and Alberto Lleras Camargo of Colombia, the technical experts suggested a new permanent agency called the Inter-American Committee for the Alliance for Progress.

The eight-nation body is designed to function as part of the Inter-American Economic and Social Council and the Organization of American States. In essence, it will be a Latin American clearing house for alliance projects.

Though the technicians completed the preliminary work, the proposal is expected to develop into a hot political issue.

## Woman Dies Of Monoxide Gas Fumes

Alliance (AP)—Funeral services will be held Monday afternoon in Alliance for 59-year-old Veleta H. Davee who was a victim of carbon monoxide gas.

County attorney John O. Anderson said Mrs. Davee's death was due to an improperly vented propane space heater which she recently installed herself.

Mrs. Davee was found in her Alliance apartment Thursday evening but Anderson said she had been dead since sometime Wednesday night.

Earlier Thursday an upstairs tenant in the building, Harry Cooper, was taken to the hospital. Firemen thought Cooper had been overcome by fumes from a kerosene stove in his apartment but Anderson said it appeared Cooper may have been overcome by fumes seeping up from the Davee apartment. Cooper is recovering.

Mrs. Davee founded the first Alliance credit bureau and operated it for 20 years. With her late husband she had also operated a bowling alley.

Brazil has little to show for the millions of dollars it has received under the alliance. As of the end of September total loans and grants authorized for Brazil reached \$752 million.

St. Paul (AP)—One youth was killed and another injured early Sunday when an automobile struck a guard rail about one-half mile east of the U.S. 281 and Nebraska 22 junction north of St. Paul.

The Highway Patrol said a 19-year-old Cletus Caudill of Wolbach was killed.

He was a passenger in a car driven by 18-year-old Raymond Bant of Cushing. Bant suffered a broken rib, facial lacerations and abrasions and was listed in good condition at a St. Paul hospital.

Officers said the car was eastbound on Nebraska 22 when it hit the guard rail.

Washington (UPI)—The Federal Aviation Agency (FAA) warned airplane pilots Sunday to be on the alert for the annual migration of whistling swans from the Great Lakes to the Chesapeake Bay.

Several years ago an airliner struck one of the swans near Baltimore, Md., and crashed.

In a notice to airmen, the government agency said the southeastern migration of the big birds would be at its peak between now and Nov. 15.

It said the heaviest flights were expected to occur over Minnesota, Wisconsin, the southern half of Michigan, northern Ohio, western New York, western and central Pennsylvania and Maryland. The agency said migrating waterfowl tend to dive when approached closely by planes. For this reason it told pilots not to fly directly under migrating swans, geese or ducks.

## FAA Tells Pilots To Look Out For Whistling Swans

Washington (UPI)—The Federal Aviation Agency (FAA) warned airplane pilots Sunday to be on the alert for the annual migration of whistling swans from the Great Lakes to the Chesapeake Bay.

Several years ago an airliner struck one of the swans near Baltimore, Md., and crashed.

In a notice to airmen, the government agency said the southeastern migration of the big birds would be at its peak between now and Nov. 15.

It said the heaviest flights were expected to occur over Minnesota, Wisconsin, the southern half of Michigan, northern Ohio, western New York, western and central Pennsylvania and Maryland. The agency said migrating waterfowl tend to dive when approached closely by planes. For this reason it told pilots not to fly directly under migrating swans, geese or ducks.

Gothenburg (AP)—A 36-year-old Rock Island, Ill., man was killed near midnight Saturday night on a county road near here when his car crashed into an embankment at a dead end junction of a county road.

The accident, which claimed the life of Paul C. Gross, occurred about 19 miles northwest of Gothenburg. The man was alone in the car.

Gothenburg (AP)—A 36-year-old Rock Island, Ill., man was killed near midnight Saturday night on a county road near here when his car crashed into an embankment at a dead end junction of a county road.

The accident, which claimed the life of Paul C. Gross, occurred about 19 miles northwest of Gothenburg. The man was alone in the car.

## EVERYBODY'S MONEY:

## Some Readers Puzzled By Investment Experts' Advice

By Merry S. Rukeyser

A number of readers of this column are curious as to why some investment counsellors caution them not to get fully invested in common stocks at this time when historic price peaks have been attained.

Some trust officers, who believe in common stocks for long term investment, have been advising their accounts to invest about half of new funds in equities and keep the remainder in short term high grade obligations which constitute reserve buying power for the future.

RUKEYSER

The reasoning behind such advice deserves analysis. The unsophisticated ask why any stocks should be bought if analysts think current prices are too high. But the prudent money managers are less dogmatic. They have a sense of humility concerning their own prowess in reading the crystal ball.

Certainly recommendations to buy should not be made unless the security analyst thinks that such vehicles are destined to fulfill the objective of the investor. If the goal is long term growth, then the adviser may conclude that, despite the possibility of intermediate price fluctuations, the long term trend may be upward. The reserve buying power provides the ability to buy additional amounts on breaks.

Where investment is made out of income, the principle of "dollar averaging," that is, periodically putting precisely the same number of dollars in exactly the same stock, can be followed. This technique to succeed must be predicated on wise initial selection of shares of companies with strong survival prospects.

The reservation of buying power is also helpful in meeting future opportunities and for such technical matters as the exercise of valuable rights given by companies whose shares are already owned.

It is desirable to operate at all stages of the business cycle. Too frequently the imprudent alibi their failure to discipline themselves and save part of their income on the ground that prices are too high. The thrift habit should be perennial, and there is always something suitable whether in fixed dollar investments or in equities as the case might be.

Q.—A physician, who reads this column in the San Diego Tribune, writes: "My father, prior to 1929, purchased shares of a number of companies (drugs and manufacturers). These certificates have been lost over this long period of time. I do not know the names of the companies. Is there any way, and if so, what procedure do you recommend that I follow to find the companies in which he had stock? Also if these stock certificates are of any value after this long period of time."

A.—Stock certificates of solvent companies continue to have value, but, unless you can find in your father's records, a list of his holdings, you will be searching for a needle in a haystack. This is particularly true of the companies you describe as manufacturers. I would suggest you start out with the drug companies. You can get a list with addresses from the manuals in the library of one of your local banks or brokerage offices. Then I suggest you write the secretary of such companies to ask whether stock is registered in the name of your father. If the shares have value and have distributed dividends, it is unlikely that no one has heard from such enterprises. Possibly the "investment" was

made in shares of fly-by-nights, which are no longer a round. Such carelessness points up the desirability of using the services of banks and trust companies which provide custodial service for securities or a more advanced investment supervision through living trusts and otherwise.

Q.—A professional man, aged 31 with a wife and two young children, expects to earn \$15,000 this year and be in the \$25,000 to \$30,000 bracket in the next five years. He has \$50,000 in term life insurance, \$4,000 in savings, and no money invested.

He wants to know whether he has enough insurance, and whether he has the right type. He would like to invest \$50,000 a month, and asks whether to buy stocks, bonds, mutual funds, or annuities.

He also wants to know whether to buy a home now, or put it off until later, and begin investing in securities.

A.—This reader must be commended for his intelligent interest in his financial problems. He should, however, be clear that he cannot dispose of more than 100% of his present modest income.

Accordingly, until he increases his gross income in these days of heavy family responsibilities, he is on the right track in spreading his limited life insurance premium funds to give his family the greatest protection. Make sure that the term contracts are renewable and convertible. Although there are desirable savings features in so-called "permanent insurance," you would not be warranted at this juncture in cutting down on the face value of your coverage. Even \$50,000 face amount would produce an income of only \$2,000 a year. This can be stretched by providing in the settlement options that interest be supplemented by a systematic plan for exhausting the principal over a period of years. As you increase your income, you can begin to acquire family income policies, which combine diminishing term with permanent ordinary life. You should also carry hospitalization and major medical coverage for yourself and your dependents.

At the age of 31, with your life ahead of you, you are far too young to start on annuities, which become attractive in the late senior age groups.

While you are beginning to plan an estate, I suggest you rent a home and use your savings to acquire marketable securities. Since your funds are limited and you lack investment knowledge, mutual funds bought regularly on a "dollar averaging" basis would be indicated. I am mailing you a list of "no load" funds.

Even as you accumulate investments, you ought to continue to carry a savings account.

(Mr. Rukeyser will be pleased to receive inquiries from readers concerning financial problems. Letters with self-addressed, stamped envelopes should be sent in care of The Lincoln Star. Questions of general interest will be answered in the column.)

## Gas Station Worker Hit; \$40 Stolen

Police Sunday night were still looking for a man, in his early twenties, who assaulted and robbed an attendant at the Munson Derby Service Station at 65th and Cotner Saturday night.

George Wasson, 22, of 7211 Starr, victim of the assault and robbery, told police the man entered the station and asked for a five dollar bill in return for four one dollar bills and a variety of change.

Wasson said he gave the man a five from his billfold and was putting the change into his pocket when the man struck him.

The man grabbed Wasson's billfold and fled. Wasson said there was about \$40 in the billfold.

Police said a black leather jacket discarded by the man was found near 66th and Orchard.

Police Sunday night were still looking for a man, in his early twenties, who assaulted and robbed an attendant at the Munson Derby Service Station at 65th and Cotner Saturday night.

George Wasson, 22, of 7211 Starr, victim of the assault and robbery, told police the man entered the station and asked for a five dollar bill in return for four one dollar bills and a variety of change.

Wasson said he gave the man a five from his billfold and was putting the change into his pocket when the man struck him.

**MR. TWEEDY** by Ned Riddle

"That's the way the cookie crumbles."

"Grownups can do anything—Why does Daddy LIKE naps?"

WE'D BETTER GIVE UP OUR HIKE, FRED. THIS FOG IS SO THICK WE MIGHT GET SEPARATED!

ANY IT'S BEGINNING TO THIN OUT?

DON'T BE SILLY! THAT'S WHY WE'RE ROPED TOGETHER!

DICK TRACY

IN DOC ORTAS OFFICE? A TYPEWRITER STAND AND A CASE CONTAINING A CHAUFFEURS OUTFIT?

IF THERE WAS A CHAUFFEUR, HE MUST HAVE BEEN A BLOND.

—OR IS DOC ORTA A BLOND?

WHO KNOWS, SAM, BUT IT FIGURES DOC ORTA WOULD NOT BE HIS OWN CHAUFFEUR.

THEN WE'VE GOT TWO PEOPLE TO LOOK FOR: SAYS SAM, "THE DOG AND HIS CHAUFFEUR."

RIGHT ON THE BUTTON! AN EVEN 72!

THE HEART OF JULIET JONES

NOW, I CALL THIS REAL NEIGHBORLY INVITING A MERE STRANGER LIKE ME OUT TO LUNCH.

WHAT'LL IT BE? LOSE A WIFE AND GAIN A FRIEND? OR WIN A WIFE AND LIVE TO REGRET IT?

DO YOU MIND A RIDE INTO THE COUNTRY, MISS POOLE? THERE'S A LOVELY LITTLE RESTAURANT ABOUT AN HOUR OUT OF DEVON.

FRANKLY, MISS JONES—I NEVER FIGURED YOU FOR THE WARM, FRIENDLY TYPE. BUT YOU LIVE AND LEARN, HUH?

THAT'S RIGHT, MISS POOLE—YOU LIVE AND LEARN.

MARY WORTH

YOU MEAN... THAT JAN MIGHT... BE A CRIPPLE, DOCTOR? ...ALL THE REST OF HER LIFE?

IT IS POSSIBLE, MR. BUTLER... BUT NOT CERTAIN, OF COURSE!—THE RECOVERY PROGNOSIS FOR A BACK INJURY IS DIFFICULT TO MAKE!

LET'S... NOT TELL HER ABOUT THAT POSSIBILITY!... KNOWING HER SO WELL... I DON'T THINK SHE COULD TAKE IT!... RIGHT NOW!

YES... HOPE IS A POTENT MEDICINE!... WE'LL TRY, OF COURSE, TO KEEP HER SPIRITS UP!

VISITORS WAITING ROOM

BEETLE BAILEY

GOLLY, ONE-THIRTY AND BEETLE AND KILLER AREN'T IN YET! I JUST CAN'T SLEEP TILL THEY GET IN.

WHY? DURN-BURN IT! MY LIGHTS BROKEN! I CAN'T JUST SIT AROUND IN THE DARK!

NOW, THERE'S A SIGHT THAT WOULD WARM EVERY MOTHER'S HEART

DONALD DUCK

THIS STORE UNFAIR! DO NOT ENTER

BUZZ... UNFAIR! DO NOT ENTER

UNFAIR! NOT ENTER

COMPLAINT DEPARTMENT

BRINGING UP FATHER

MAGGIE, HERE COMES MRS. DE TARGET

SHE'S SUCH A BORE! TELL HER I WENT OUT

SHE JUST WANTED TO KNOW IF YOU HAD HEARD THAT MR. AND MRS. HOLDEN HAD SEPARATED

HELLO, MRS. DE TARGET—I'M SO SORRY I WAS OUT WHEN YOU CALLED

LAFF-A-DAY

"What do you want for supper tonight, Ralph?"

THE GIRLS

"Thank goodness!"

POGO

LOTTA OF MEN IS MAKIN' BIG SPEECHES ON RADIO AND TEEVY TODAY... BET A LOT OF FOLKS IS HURRYIN' HOME RIGHT NOW...

HOW COME?

SO'S THEY CAN TURN THE SOUND OFF FOR TWO MINUTES AT ELEVEN O'CLOCK...

OH

B.C.

I'VE WRITTEN A BOOK: "B.C.'S FIRST READER."—IT TEACHES YOU HOW TO READ.

WE ALREADY KNOW HOW TO READ.

I KNOW! BUT THIS GIVES ME CREDIT FOR IT.

THE JACKSON TWINS

YOU REALLY CAME TO LIFE ON THESE LAST QUESTIONS.

IT'S NO HONOR GRADE, TO BE SURE, STEVE...

BUT IN MY BOOK A 72 IS PASSING!!

IF EVER A BOY EARNED THE RIGHT TO PLAY FOR HIS SCHOOL, YOU HAVE! GO GET 'EM!

AND IF THEY EVER FORM AN HONOR SOCIETY FOR HONOR, THERE'S MY NOMINEE FOR PRESIDENT!

RIP KIRBY

WE'VE FOOLED THEM COMPLETELY! ALL THAT REMAINS IS THE CAPTURE WHEN THEY TRY THEIR BLACKMAIL...

STRANGE, I NEVER HEARD OF THIS WIGGERS UNTIL I SAW HIS NAME IN THAT COLUMN... BUT THAT MOONLIKE FACE... I'VE SEEN IT BEFORE...

I MUST HAVE NOTICED IT IN ONE OF THESE SOCIETY MAGAZINES WITHOUT REALIZING WHO HE WAS...

THE RYATTS

I'LL FIND OUT WHO DID IT, MOTHER.

STICK 'EM UP, YOU TWO!

HERE'S YOUR CULPRIT, MOTHER

SHE WAS THE ONE WITH CLEAN HANDS

DID YOU KNOW THIS? IT'S A FACT:

United States investments in Northern Ireland total nearly \$100,000,000. Twenty U.S. companies are in business here.

An average glass window lets about 150 times more heat from the sun enter a house than the insulated wall next to it.

Japan's tobacco monopolists, after a lapse of 25 years, plans to reopen its United States purchasing office. Cigarettes and tobacco are becoming increasingly popular in Japan.

Norway's Parliament has put up \$70,000 to start an experimental 20-member peace corps to work in underdeveloped lands.

Brazil's rice harvest last year, over 5,000,000 tons, was twice that of the United States. A bigger crop is forecast this year.

DAILY CRYPTOQUOTE

One letter simply stands for another in this example. A is used for the three U's, S for the two O's, etc. Single letters, apostrophes, the length and formation of the words are all hints. Each day the code letters are different.

Here is a practical little game that will give you a message every day. It is a "wishing well" designed to "dig out" your fortune. Count the letters in your first name. If the number of letters is 6 or more, subtract 6. If the number is less than 6, add three. The result is your key number. Start at the upper left-hand corner of the rectangle and check every one of your key numbers left to right. Then read the message the letters under the checked figures give you.
